Description of the Technology

E-279-1999/0: This invention is related to aminoflavone compounds with pharmaceutically acceptable properties, claiming pharmaceutical compositions and a method of inhibiting tumor growth. The invention improves the pharmaceutical property

of aminoflavone compounds. The present invention addresses these problems by providing a method of producing water-soluble analogues of water-insoluble drugs. In particular, the present invention describes novel analogues derived from 5-aminoflavone (TK2339) compounds. These derivatives have shown good differential activity in the NCI 60-cell line *in vitro* cancer drug screen with potent and selective cytotoxicity against CAKI-1 and A498 renal, MCF-7 breast, and OVCAR-5 ovarian carcinoma cell lines. In addition, these derivatives have shown *in vivo* activity against CAKI-1 and A498 renal carcinoma xenographs.

The novel compounds display improved solubility in aqueous solutions over the parent compounds (see below) without sacrificing potent antitumor activity. Since these compounds possess very favorable pharmaceutical properties, they have greater potential to be useful in the treatment of human cancers. The claims of the issued patent or pending patent applications of this patent family are directed to compositions comprising aminoflavone derivatives and to methods of their use.

E-296-2005/0 and E-296-2005/1: These two inventions describe 5-aminoflavone derivatives, having antibacterial, anti-estrogenic and anti-cancer activity. These inventions constitute earlier, parent 5-aminoflavone compounds, which have inferior solubility in aqueous solutions compared to new compounds outlined in E-279-1999/0 technology.

Applications for a license in the field of use filed in response to this notice will be treated as objections to the grant of the contemplated exclusive license. Comments and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: January 30, 2006.
