

the first report of ANL-CCP's T2 changes approximately three months from date of EPA's approval of the TRU WC program implemented at ANL-CCP.

In this notice, EPA is not proposing to approve WIPP Waste Information System (WWIS) for tracking of waste contents of RH debris wastes. Although the WWIS is currently approved by EPA for CH waste, the system has not yet been demonstrated by DOE for the Agency for tracking RH waste. Therefore, in accordance with 194.8(b)(2)(iii), EPA is placing a limitation on this proposed baseline that requires DOE to provide WWIS information as a T1 change. EPA will review the WWIS database populated with actual RH waste content data when the RH modules have been completed. EPA may conduct the evaluation of the WWIS during this comment period; however, no final decision or approval of the WWIS will be made until a baseline approval is finalized. No RH waste can be shipped to WIPP for disposal until EPA approves the WWIS database through the T1 process. In the future, if ANL-CCP intends to use an RTR unit to evaluate RH drum contents, EPA will evaluate this process as a T1 change.

IV. Availability of the Baseline Inspection Report for Public Comment

EPA has placed both reports discussing the results of EPA's inspections of INL-CCP and ANL-CCP in the public docket as described in **ADDRESSES**. In accordance with 40 CFR 194.8, EPA is providing the public 45 days to comment on these documents. The Agency requests comments on the proposed approval decisions and tiering designations, as described in EPA's inspection reports. EPA will accept public comment on this notice and supplemental information as described in Section 1.B. above. EPA will not make a determination of compliance before the 45-day comment period ends. At the end of the public comment period, EPA will evaluate all relevant public comments and revise the inspection reports as necessary. If appropriate, the Agency will then issue approval letters and final inspection reports, both of which will be posted on the WIPP Web site. DOE must obtain EPA approval of the WWIS, through the T1 change system prior to the disposal of RH waste at WIPP.

Information on the certification decision is filed in the official EPA Air Docket, Docket No. A-93-02 and is available for review in Washington, DC, and at the three EPA WIPP informational docket locations in New Mexico (as listed in **ADDRESSES**). The

dockets in New Mexico contain only major items from the official Air Docket in Washington, DC, plus those documents added to the official Air Docket since the October 1992 enactment of the WIPP LWA.

The requests would terminate triadimefon use in or on apples, pears, grapes, raspberries, and residential turf. The requests would not terminate the last triadimefon product registered for use in the United States. EPA intends to grant these requests at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the requests, or unless the registrants withdraw their requests within this period. Upon acceptance of this request, any sale, distribution, or use of products listed in this notice will be permitted only if such sale, distribution, or use is consistent with the terms as described in the final order.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this Action Apply to Me?

This action is directed to the public in general, and may be of interest to a wide range of stakeholders including environmental, human health, and agricultural advocates; the chemical industry; pesticide users; and members of the public interested in the sale, distribution, or use of pesticides. Since others also may be interested, the Agency has not attempted to describe all the specific entities that may be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult the person listed under **FOR FURTHER INFORMATION CONTACT**.

B. What Should I Consider as I Prepare My Comments for EPA?

1. *Submitting CBI.* Do not submit this information to EPA through regulations.gov or e-mail. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD ROM that you mail to EPA, mark the outside of the disk or CD ROM as CBI and then identify electronically within the disk or CD ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in

accordance with procedures set forth in 40 CFR part 2.

2. *Tips for preparing your comments.* When submitting comments, remember to:

II. Background on the Receipt of Requests to Amend Registrations to Delete Uses

This notice announces receipt by EPA of requests from the registrants Bayer CropScience, Bayer Environmental Science, and Bayer Advanced to cancel and amend to terminate uses of the triadimefon products listed in Tables 1 and 2. Triadimefon is a broad spectrum fungicide used for the systemic control of rust and mildew on various fruits and pineapple. In addition, it is used to control various fungal diseases on non-food use sites such as golf course and sod farm turf, pine seedlings, Christmas trees, and ornamentals. In a letter dated July 31, 2006, Bayer CropScience, Bayer Environmental Science, and Bayer Advanced requested EPA to voluntarily cancel and amend their registrations to terminate use(s) of certain products containing the pesticide triadimefon

identified in this notice Tables 1 and 2. Specifically, the registrant has agreed to voluntarily cancel all use on apples, pears, grapes, and raspberries (commercial and residential) as well as use on residential turf. The registrant's request for these use deletions will not terminate the last triadimefon products registered in the United States, or the last pesticide products registered in the United States for these uses.

III. What Action is the Agency Taking?

This notice announces receipt by EPA of requests from registrants to cancel and/or amend to terminate uses of triadimefon product registrations. The affected products and the registrants making the requests are identified in Tables 1 - 3 of this unit.

Under section 6(f)(1)(A) of FIFRA, registrants may request, at any time, that their pesticide registrations be canceled or amended to terminate one or more pesticide uses. Section 6(f)(1)(B) of FIFRA requires that before acting on a request for voluntary cancellation, EPA must provide a 30-day public comment period on the request for voluntary cancellation or use termination. In addition, section 6(f)(1)(C) of FIFRA requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or
2. The Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The triadimefon registrants have declined to waive the 180-day comment period. EPA will provide a 180-day comment period on the proposed requests.

Unless a request is withdrawn by the registrant within 180 days of publication of this notice, or if the Agency determines that there are substantive comments that warrant further review of this request, an order will be issued canceling or amending the affected registrations.

IV. What is the Agency's Authority for Taking this Action?

Section 6(f)(1) of FIFRA provides that a registrant of a pesticide product may at any time request that any of its pesticide registrations be canceled or amended to terminate one or more uses. FIFRA further provides that, before acting on the request, EPA must publish a notice of receipt of any such request in the **Federal Register**. Thereafter, following the public comment period, the Administrator may approve such a request.

V. Procedures for Withdrawal of Request and Considerations for Reregistration of Triadimefon

Registrants who choose to withdraw a request for cancellation must submit such withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**, postmarked before May 7, 2007. This written withdrawal of the request for cancellation will apply only to the applicable FIFRA section 6(f)(1) request listed in this notice. If the products have been subject to a previous cancellation

action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

VI. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products which are currently in the United States and which were packaged, labeled, and released for shipment prior to the effective date of the cancellation action.

If the request for voluntary cancellation and use termination is granted as discussed above, the Agency intends to issue a cancellation order that will allow persons other than the registrant to continue to sell and/or use existing stocks of cancelled products until such stocks are exhausted, provided that such use is consistent with the terms of the previously approved labeling on, or that accompanied, the cancelled product. The order will specifically prohibit any use of existing stocks that is not consistent with such previously approved labeling. If, as the Agency currently intends, the final cancellation

order contains the existing stocks provision just described, the order will be sent only to the affected registrants of the cancelled products. If the Agency determines that the final cancellation order should contain existing stocks provisions different than the ones just described, the Agency will publish the cancellation order in the **Federal Register**.
