SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a revision to the information collection previously approved as an emergency request. The title of the information collection is ''Fishery Products Subject to Trade Restrictions Pursuant to Certification under the High Seas Driftnet Fishing Moratorium Protection Act and the Marine Mammal Protection Act''. The information collection involves certification of admissibility for importation of certain fish and fish products that are subject to requirements of the High Seas Driftnet Fishing Moratorium Protection Act (Moratorium Protection Act) or the Marine Mammal Protection Act (MMPA).

Pursuant to a final rule implementing certain provisions of the Moratorium Protection Act (RIN 0648–BA89), certain fish or fish products of a nation may be subject to import prohibitions. To facilitate enforcement, the National Marine Fisheries Service (NMFS) requires that other fish or fish products from that nation that are not subject to the import prohibitions must be accompanied by documentation of admissibility. A duly authorized official/agent of the applicant's Government must certify that the fish in the shipments being imported into the United States (U.S.) are of a species, or from fisheries, that are not subject to an import restriction. If a nation is identified under the Moratorium Protection Act and fails to receive a positive certification decision from the Secretary of Commerce, products from that nation that are not subject to the import prohibitions must be accompanied by the documentation of admissibility.

Under the Marine Mammal Protection Act, import certification requirements apply in cases where foreign fisheries do not meet U.S. standards for marine mammal bycatch mitigation. A final rule (RIN 0648–AY15) implemented a procedure for making comparability findings for nations that are eligible for exporting fish and fish products to the United States. The nations may receive a comparability finding to export fish and fish products by providing documentation that a nation's bycatch reduction regulatory program is comparable in effectiveness to that of the United States. Fish and fish products from a foreign fishery without a comparability finding are prohibited from entry into U.S. commerce. To facilitate enforcement, NMFS requires that other fish or fish products from that nation that are not subject to the import prohibitions must be accompanied by documentation of admissibility.

II. Method of Collection

The information is collected electronically at the time of entry filing in the Automated Commercial Environment (ACE) of U.S. Customs and Border Protection. The exporter completes information on the contents/origin of the fish products contained in the export shipment and obtains export government certification that the fish meet the U.S. admissibility criteria. Entry filers (importers or customs brokers) obtain the completed Certification of Admissibility from the exporter (attached to the shipment

packaging or via email or fax) and upload the image file of the document to ACE via the Document Image System.
