

§ 2.59 [Amended]

■ 31. In § 2.59 paragraph (f), removing the word “limit” adding in its place “frames”.

§ 2.62 [Amended]

■ 32. In § 2.62 paragraphs (a) and (b), removing the word “limit” adding in its place “frame”.

Subpart I—General Information**§ 2.66 [Amended]**

■ 33. Revise § 2.66 with the following:

§ 2.66 What are FOIA Requester Centers and the FOIA Public Liaison?

(a) Employees at FOIA Requester Centers typically serve as your first point of contact for questions about how the FOIA works. Even before you make a request, employees at FOIA Requester Centers can assist you by: Identifying information that is already posted and available; informing you about the types of records maintained by the bureau; providing suggestions for formulating requests; describing the Department’s various processing tracks and the average processing times for the various tracks; and answering questions about expedited processing standards and the FOIA’s fee provisions. After you make a request, questions about its status can also be answered by employees at the applicable FOIA Requester Center.

(b) If you need further information or assistance after contacting the applicable FOIA Requester Center, the FOIA Public Liaison reports to the Department’s Chief FOIA Officer and is responsible for assisting in reducing delays, increasing transparency and understanding of the status of requests, and resolving disputes between you and the agency (including notifying you of your right to seek dispute resolution services from OGIS).

(c) If you need further information or assistance after contacting the applicable FOIA Requester Center and the FOIA Public Liaison, you may wish to seek dispute resolution services from OGIS.

(d) Contact information for the FOIA Requester Centers and the FOIA Public Liaison is available at <https://www.doi.gov/foia/foiacenters>.

§ 2.70 [Amended]

■ 34. In § 2.70:

■ a. In the definition of “Educational institution”, add the following sentence after the words “further scholarly research.” “Teachers (if they demonstrate how the requested records will further their teaching, scholarly research, or production of scholarly works) and students (if they demonstrate how the requested records

will further their coursework or other school-sponsored activities) may also qualify as an educational institution for the purposes of this definition.”

■ b. In the definition of “Multitrack processing”: after “first-in/first-out basis” add the words “, but other factors, such as litigation, may affect the sequence and/or timing of processing”.

■ c. In the definition of “Record” remove “means an agency record” and add in its place “is any item, collection, or grouping of information that already is recorded, is reasonably encompassed by your request, and”.

■ d. In the definition of “Representative of the news media”, add the following new sentence two after the phrase “work to an audience.”: “Distributing copies of released records, electronically or otherwise, does not qualify as using editorial skills to turn the raw materials into a distinct work.”

Dated: December 14, 2018.

Daniel Jorjani,

Principal Deputy Solicitor, Exercising the Authority of the Solicitor.

BILLING CODE 4310–10–P

FEDERAL COMMUNICATIONS COMMISSION**47 CFR Parts 2 and 25**

[IB Docket No. 18–315; FCC 18–160]

Earth Stations in Motion To Include NGSO Satellite Systems

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: In this document, the Federal Communications Commission proposes to amend its rules to establish a regulatory framework for earth stations in motion (ESIMs) communications with non-geostationary-satellite orbit (NGSO), fixed-satellite service (FSS) satellite systems that would be analogous to that which currently exists for ESIMs communicating with geostationary-satellite orbit (GSO) FSS systems.

DATES: Comments are due on or before February 11, 2019. Reply comments are due on or before March 13, 2019.

ADDRESSES: You may submit comments, identified by IB Docket No. 18–160, by any of the following methods:

- *Federal Communications Commission’s Website:* <http://apps.fcc.gov/ecfs>. Follow the instructions for submitting comments.
- *People with Disabilities:* Contact the FCC to request reasonable

accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: FCC504@fcc.gov or phone: 202–418–0530 or TTY: 202–418–0432.

For detailed instructions for submitting comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT:

Cindy Spiers, 202–418–1593.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission’s Notice of Proposed Rulemaking (NPRM), FCC 18–160, adopted November 15, 2018, and released November 16, 2018. The full text of the NPRM is available at https://apps.fcc.gov/edocs_public/attachmatch/FCC-18-160A1.pdf. The NPRM is also available for inspection and copying during business hours in the FCC Reference Information Center, Portals II, 445 12th Street SW, Room CY–A257, Washington, DC 20554. To request materials in accessible formats for people with disabilities, send an email to FCC504@fcc.gov or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (TTY).

Comment Filing Requirements

Interested parties may file comments and reply comments on or before the dates indicated in the **DATES** section above. Comments may be filed using the Commission’s Electronic Comment Filing System (ECFS).

- *Electronic Filers.* Comments may be filed electronically using the internet by accessing the ECFS, <http://apps.fcc.gov/ecfs>.

- *Paper Filers.* Parties who file by paper must include an original and four copies of each filing. Filings may be sent by hand or messenger delivery, by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission’s Secretary, Office of the Secretary, Federal Communications Commission.

- All hand-delivered or messenger-delivered paper filings for the Commission’s Secretary must be delivered to FCC Headquarters at 445 12th Street SW, Room TW–A325, Washington, DC 20554. All hand deliveries must be held together with rubber bands or fasteners. Any envelopes must be disposed of before entering the building.

- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9300 East Hampton Drive, Capitol Heights, MD 20743.

- U.S. Postal Service first-class, Express, and Priority mail must be

addressed to 445 12th Street SW, Washington DC 20554.

- *Persons with Disabilities.* To request materials in accessible formats for persons with disabilities (braille, large print, electronic files, audio format), or to request reasonable accommodations for filing comments (accessible format documents, sign language interpreters, CART, etc.), send an email to fcc504@fcc.gov or call 202-418-0530 (voice) or 202-418-0432 (TTY).

Ex Parte Presentations

The Commission will treat this proceeding as a “permit-but-disclose” proceeding in accordance with the Commission’s *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter’s written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with rule 1.1206(b). In proceedings governed by rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (e.g., .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission’s *ex parte* rules.

Paperwork Reduction Act

This document contains proposed new and modified information

collection requirements. The Commission, as part of its continuing effort to reduce paperwork burdens, invites the general public and the Office of Management and Budget to comment on the information collection requirements contained in this document, as required by the Paperwork Reduction Act of 1995. In addition, pursuant to the Small Business Paperwork Relief Act of 2002, the Commission seeks specific comment on how the Commission might further reduce the information collection burden for small business concerns with fewer than 25 employees.

Synopsis

In this Notice of Proposed Rulemaking (NPRM), the Commission seeks comment on whether to establish a regulatory framework for ESIMs communications with NGSO FSS systems that would be analogous to that which currently exists for ESIMs communicating with GSO FSS systems. First, the Commission seeks comment on allowing ESIMs to communicate with NGSO FSS systems in many of the same conventional Ku-band, extended Ku-band, and Ka-band frequencies that were discussed in the ESIMS Report and Order and Further Notice, with the exception of the frequency bands 18.6–18.8 GHz and 29.25–29.5 GHz. Second, the Commission seeks comment on extending blanket earth station licensing, which is available to ESIMs communicating with GSO FSS systems, to ESIMs communicating with NGSO FSS systems. Finally, the Commission seeks comment on revisions to specific provisions in our rules to implement these changes.

Proposal Overview

The Commission believes that now is the appropriate time to seek comment on rules governing ESIMs communicating with NGSO FSS systems. Currently, there is only one NGSO FSS system—O3b Limited (O3b)—communicating with earth stations in the United States, and communications between O3b and ESVs have already been authorized, although on a non-protected non-interference basis given that no rules allowing such communications exist. However, given the large number of applications for NGSO FSS systems that intend to provide service to earth stations at fixed locations as well as to ESIMs, it is important that the possibility of having rules for NGSO FSS ESIMs operations be considered. A regulatory framework covering such communications would provide certainty for both NGSO FSS operators and their customers. In

addition, comments in response to the ESIMs NPRM expressed concern that delaying consideration and adoption of rules governing communications between ESIMs and NGSO FSS systems could place U.S. customers at a disadvantage when other countries are moving ahead on these matters. Commenters in response to the ESIMs NPRM state that antenna manufacturers, ESIM operators, and ultimately U.S. consumers would all benefit from development of Commission rules that define operating parameters for communications between ESIMs and both NGSO and GSO satellites. In addition, commenters note the advantages of allowing communications between ESIMs and NGSO FSS systems, such as robust and uninterrupted coverage of polar regions where international air traffic is increasingly concentrated and which are not adequately covered by GSO satellites. The Commission agrees with commenters that the time is ripe to evaluate whether the Commission should implement rules for ESIMs communicating with NGSO FSS systems.

Frequency Bands for NGSO FSS ESIMs and Associated Rule Changes. The Commission seeks comment on, to the extent feasible, allowing ESIMs to communicate with NGSO FSS systems in the Ku- and Ka-bands where the Commission’s rules allow ESIM communications with GSO FSS space stations, with the exception of the frequency bands 18.6–18.8 GHz and 29.25–29.5 GHz.

The Commission proposes to allow ESIMs to communicate with NGSO FSS systems on a primary basis in the following frequency bands: 11.7–12.2 GHz (space-to-Earth); 14.0–14.5 GHz (Earth-to-space); 18.3–18.6 GHz (space-to-Earth); 19.7–20.2 GHz (space-to-Earth); 28.35–28.6 GHz (Earth-to-space); and 29.5–30.0 GHz (Earth-to-space). There are no allocations to terrestrial services in any of these bands. Accordingly, the Commission seeks comment on adding paragraph (c) to footnote NG527A to indicate that ESIMs can operate with NGSO FSS space stations in these six frequency bands provided that such operations do not cause harmful interference to, or claim protection from, GSO FSS networks. There is also a secondary allocation to the Space Research service in the band 14–14.2 GHz. In order to ensure compatibility between NGSO ESIM and Space Research operations, the Commission seeks comment on modifying 47 CFR 25.228(j)(1) to extend to NGSO FSS systems conditions that

currently apply to ESIM operation with GSO FSS space stations.

The Commission also proposes to allow ESIMs to communicate with NGSO FSS systems on a primary basis in the 18.8–19.3 GHz (space-to-Earth), and the 28.6–29.1 GHz (Earth-to-space) frequency bands. In these bands, there are no terrestrial allocations and GSO FSS operations are secondary with respect to NGSO FSS. Accordingly, the Commission seeks comment on adding paragraph (e) to footnote NG527A to indicate that ESIMs can operate both with a GSO FSS space station and with NGSO FSS systems in these two frequency bands. Also, in these bands, GSO FSS operations must not cause harmful interference to, or claim protection from, NGSO FSS networks.

The Commission seeks comment on allowing ESIMs to receive signals from NGSO FSS space stations in the 10.7–11.7 GHz (space-to-Earth) frequency bands, on an unprotected basis, with respect to transmissions from non-Federal fixed service (FS) stations. FSS and FS are co-primary in these frequency bands and receive terrestrial stations will be protected by imposing on space station transmissions the appropriate power-flux density limits. Accordingly, the Commission seeks comment on revising paragraph (a) of footnote NG527A to indicate that ESIMs can operate on a non-protected basis with regard to non-Federal fixed service in this frequency band, both with a GSO FSS space station and with NGSO FSS systems. Also, in this band, NGSO FSS operations must not cause harmful interference to, or claim protection from, GSO FSS networks.

Similarly, the Commission seeks comment on allowing ESIMs to receive signals from NGSO FSS space stations in the 19.3–19.4 GHz (space-to-Earth) and 19.6–19.7 GHz (space-to-Earth) frequency bands, on an unprotected basis, with respect to transmissions from non-Federal fixed service stations. FSS and FS are co-primary in these frequency bands and receive terrestrial stations will be protected by imposing on space station transmissions the appropriate power-flux density limits. Accordingly, the Commission seeks comment on adding paragraph (f) to footnote NG527A to indicate that ESIMs can operate with NGSO FSS systems in these two frequency bands on a non-protected basis with regard to non-Federal fixed service. Also, in these frequency bands, NGSO FSS operations must not cause harmful interference to, or claim protection from, GSO FSS networks.

The Commission seeks comment on allowing ESIMs to receive signals from

NGSO FSS systems on a secondary basis in the 17.8–18.3 GHz (space-to-Earth) frequency band. This frequency band is allocated to the FS on a primary basis and, given the FSS secondary status, ESIM receive earth stations will not be entitled to protection. Protection of terrestrial operations in this band will be ensured by imposing on space station transmissions the appropriate power-flux density limits. Accordingly, the Commission seeks comment on adding paragraph (d) to footnote NG527A to indicate that ESIMs can operate on a non-protected basis with regard to non-Federal fixed service in this frequency band, both with a GSO FSS space station and with NGSO FSS systems. Also, in this band, NGSO FSS operations must not cause harmful interference to, or claim protection from, GSO FSS networks.

The Commission will not consider allowing ESIMs to communicate with NGSO FSS systems in bands where communications with NGSO FSS space stations are not permitted under the U.S. Table of Frequency Allocations because the Commission believes the reasons for such limitations are also valid for ESIMs operating with NGSO FSS systems. Specifically, the Commission would not allow NGSO FSS ESIMs to operate in the 18.6–18.8 GHz (space-to-Earth) and 29.25–29.5 GHz (Earth-to-space) frequency bands.

Blanket Licensing. The Commission seeks comment on permitting blanket earth station licensing of ESIMs operating with NGSO FSS systems. Such blanket licensing would further maximize efficient spectrum use for the increased provision of broadband access and additional flexibility for FSS systems in bands where blanket licensing is already available for earth stations operating at fixed locations. The Commission believes that blanket licensing is appropriate given that ESIMs' communications with NGSO FSS systems would be limited to frequency bands in which NGSO FSS systems have a primary status, or have been found to be able to operate on a secondary or non-conforming basis, without causing interference to primary users of those bands. The Commission seeks comment on extending blanket licensing to ESIMs operating with NGSO FSS space stations.

Other Rule Revisions. In the paragraphs below, the Commission addresses other changes to our rules, in addition to those discussed above in connection with the frequency bands being proposed for NGSO FSS ESIM operation. The Commission seeks comment on these changes, and on any

others necessary to implement the ESIM NGSO FSS operation described here.

First, the Commission seeks comment on amending the list of frequencies available to ESIMs in Sections 25.202(a)(8) and (a)(10) to reflect these changes.

Second, the Commission seeks comment on changes to Part 25 of the Commission's rules governing satellite communications to allow ESIM NGSO FSS operation as described above. Specifically, Sections 25.115(l)–(n) contain requirements in paragraphs (1), (2), and (3)(i) that pertain to the two-degree spacing rules for ESIMs communicating with GSO FSS space stations, which are not applicable to NGSO systems. The requirements in paragraphs (3)(ii)–(iv) of this section, however, are also appropriate for ESIMs operating in NGSO FSS systems. The Commission seeks comment on adding a new paragraph (o) to Section 25.115 to codify these requirements for ESIMs that communicate with NGSO FSS space stations. The Commission also seeks comment on changing the cross-references contained in the information requirements for earth station applications set forth in Section 25.115 for earth stations communicating with GSO and NGSO FSS space stations.

Third, Section 25.228 contains requirements in paragraphs (a), (b), (c), that codify the two-degree spacing requirements for ESIMs communicating with GSO FSS satellite networks, but are not specifically worded to apply only to such ESIMs. The Commission seeks comment on stating that these paragraphs apply only to ESIMs communicating with GSO FSS satellite networks. The requirements in the remaining paragraphs of Section 25.228 are equally applicable for ESIMs communicating with GSO FSS systems and NGSO FSS systems, and therefore the Commission does not consider any changes to them. Paragraph (j) of Section 25.228 is explicitly limited to ESIMs transmitting to GSO FSS satellites, and the Commission seeks comment on revising the language of the rule to apply to Ku-band ESIMs communicating with NGSO FSS space stations as well.

Fourth, consistent with these changes, the Commission would amend our definitions of ESV, VMES, and ESAA in Section 25.103, which restrict communications to "geostationary-orbit FSS space stations." Pursuant to what was described above, communications between ESVs, VMESs, and ESAAs would also be permitted in NGSO FSS systems. Accordingly, the Commission seeks comment on removing the word

“geostationary-orbit” from these definitions.

Finally, the Commission’s Ka-band Plan has a secondary designation for NGSO-FSS in the 29.5–30.0 GHz band, as described in the *NGSO FSS Order*. The licensing provisions in Section 25.115(f) adopted in the *NGSO FSS Order*, however, inadvertently omitted the 29.5–30.0 GHz band. The Commission proposes to take this opportunity to extend the provisions of Section 25.115(f) to the 29.5–30.0 GHz band and seek comment on this proposal.

Other. The Commission recognizes that NGSO ESIM operations add a level of complexity in that both earth stations and space stations will be moving while communicating, and transitioning communications from one satellite to another will often be required. The Commission does not believe that these operational characteristics necessitate additional requirements on ESIM communications with NGSO FSS space stations beyond what the Commission has considered here because such operations are already being conducted. For example, O3b successfully provides broadband services to ESVs using an NGSO FSS constellation that was granted market access by the Commission through a waiver of the Table of Frequency Allocations and Ka-band Plan. In addition, several of the NGSO FSS constellations recently authorized or granted market access to the United States by the Commission intend to use earth stations in motion. For instance, OneWeb has recently joined an alliance of companies in the aviation sector focused on the provision of broadband communications to airplanes. The Commission invites comments on this conclusion, but also seek comment on the level of complexity that communications with ESIMs would introduce to the coordination between multiple NGSO FSS constellations under the Commission’s rules and the potential for in-line interference as compared to that associated with the coordination between NGSO FSS constellations if communications were limited to fixed earth stations.

The Commission does not think there will be significant costs associated with these changes and the Commission invites comments that will help estimate costs and benefits of the rule changes. In addition, the Commission seeks comment on whether there are any other issues regarding the framework discussed for NGSO ESIMs operations that the Commission should consider. The Commission also seeks comment on any possible effects ESIMs

communicating with NGSO FSS space stations may have on existing or future services in these bands or adjacent frequency bands. For example, the Commission notes that the Commission has an open proceeding exploring additional uses of “mid-band spectrum,” including bands considered for ESIM communication with NGSO FSS systems.

As required by the Regulatory Flexibility Act (RFA),¹ the Commission has prepared this Initial Regulatory Flexibility Analysis (IRFA) of the possible significant economic impact on a substantial number of small entities by the policies and rules proposed in this Notice. The Commission requests written public comments on this IRFA. Commenters must identify their comments as responses to the IRFA and must file the comments by the deadlines for comments on the Notice provided above in Section V.B. The Commission will send a copy of the Notice, including this IRFA, to the Chief Counsel for Advocacy of the Small Business Administration.² In addition, the Notice and IRFA (or summaries thereof) will be published in the **Federal Register**.³

Initial Regulatory Flexibility Analysis

A. Need for, and Objectives of, the Proposed Rules

The Notice of Proposed Rulemaking proposes to allow ESIMs to communicate with NGSO FSS space stations in the Ku- and Ka-bands.

B. Legal Basis

The proposed action is authorized under Sections 4(i), 7(a), 10, 303, 308(b), and 316 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 157(a), 160, 303, 308(b), 316.

C. Description and Estimate of the Number of Small Entities To Which the Proposed Rules May Apply

The RFA directs agencies to provide a description of, and, where feasible, an estimate of, the number of small entities that may be affected by the proposed rules, if adopted.⁴ The RFA generally defines the term “small entity” as having the same meaning as the terms “small business,” “small organization,” and “small governmental jurisdiction.”⁵ In addition, the term “small business”

¹ See 5 U.S.C. 603. The RFA, *see* 5 U.S.C. 601 *et seq.*, has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), Public Law 104–121, Title II, 110 Stat. 857 (1996).

² See 5 U.S.C. 603(a).

³ *Id.*

⁴ 5 U.S.C. 603(b)(3).

⁵ 5 U.S.C. 601(6).

has the same meaning as the term “small business concern” under the Small Business Act.⁶ A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the Small Business Administration (SBA).⁷

Satellite Telecommunications. This category comprises firms “primarily engaged in providing telecommunications services to other establishments in the telecommunications and broadcasting industries by forwarding and receiving communications signals via a system of satellites or reselling satellite telecommunications.”⁸ The category has a small business size standard of \$32.5 million or less in average annual receipts, under SBA rules.⁹ For this category, Census Bureau data for 2012 show that there were a total of 333 firms that operated for the entire year.¹⁰ Of this total, 299 firms had annual receipts of less than \$25 million.¹¹ Consequently, the Commission estimates that the majority of satellite telecommunications providers are small entities.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

The NPRM proposes to allow ESIMs to communicate with NGSO FSS space stations in the Ku- and Ka-bands. This would reduce paperwork costs for such satellite operators who would no longer need to file separate application materials for these systems. Operators will also no longer need to request waivers for operations that would be covered under specific regulations.

⁶ 5 U.S.C. 601(3) (incorporating by reference the definition of “small business concern” in 15 U.S.C. 632). Pursuant to the RFA, the statutory definition of a small business applies “unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the **Federal Register**.” 5 U.S.C. 601(3).

⁷ Small Business Act, 15 U.S.C. 632 (1996).

⁸ U.S. Census Bureau, 2012 NAICS Definitions, “517410 Satellite Telecommunications”; <http://www.census.gov/naics/2007/def/ND517410.HTM>.

⁹ 13 CFR 121.201, NAICS code 517410.

¹⁰ U.S. Census Bureau, 2012 *Economic Census of the United States*, Table EC1251SSSZ4, Information: Subject Series—Etab and Firm Size: Receipts Size of Firms for the United States: 2012, NAICS code 517410 http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ECN_2012_US_51SSSZ4&prodType=table.

¹¹ *Id.*

E. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

The RFA requires an agency to describe any significant, specifically small business, alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): “(1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rules for such small entities; (3) the use of performance rather than design standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities.”¹²

The NPRM proposes to allow ESIMs to communicate with NGSO FSS space stations in the Ku- and Ka-bands. This would reduce the economic and other impacts for these service providers by reducing the regulatory burden. Specifically, providers would no longer have to file applications that are outside of the standard rule provisions. However, the Commission invites comment on this change and any alternatives.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

None.

List of Subjects

47 CFR Part 2

Radio, Table of Frequency Allocations.

47 CFR Part 25

Administrative practice and procedure, Earth stations, Satellites. Federal Communications Commission.

Cecilia Sigmund,

Federal Register Liaison Officer, Office of the Secretary.

Proposed Rules

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR parts 2 and 25 as follows:

PART 2—FREQUENCY ALLOCATIONS AND RADIO TREATY MATTERS; GENERAL RULES AND REGULATIONS

■ 1. The authority citation for part 2 continues to read as follows:

Authority: 47 U.S.C. 154, 302a, 303, and 336, unless otherwise noted.

§ 2.106 [Amended].

■ 2. Amend § 2.106, the Table of Frequency Allocations, as follows:

■ a. Revise footnote NG527A in the list of Non-Federal Government (NG) Footnotes.

■ b. Revise paragraph (a) and paragraphs (c) through (f). The revisions and additions read as follows:

§ 2.106 Table of Frequency Allocations.

* * * * *

Non-Federal Government (NG) Footnotes

* * * * *

NG527A Earth Stations in Motion (ESIMs), as regulated under 47 CFR part 25, are an application of the fixed-satellite service (FSS) and the following provisions shall apply:

(a) In the 10.7–11.7 GHz band, ESIMs may be authorized for the reception of FSS emissions from both geostationary and non-geostationary satellites, subject to the conditions that these earth stations may not claim protection from transmissions of nonFederal stations in the fixed service and that non-geostationary-satellite systems not cause unacceptable interference to, or claim protection from, geostationary-satellite networks.

* * * * *

(c) In the bands 11.7–12.2 GHz (space-to-Earth), 14.0–14.5 GHz (Earth-to-space), 18.3–18.6 GHz (space-to-Earth), 19.7–20.2 GHz (space-to-Earth), 28.35–28.6 GHz (Earth-to-space), and 29.5–30.0 GHz (Earth-to-space), ESIMs may be authorized to communicate with non-geostationary satellites, subject to the condition that nongeostationary-satellite systems may not cause unacceptable interference to, or claim protection from, geostationary-satellite networks.

(d) In the band 17.8–18.3 GHz (space-to-Earth), ESIMs may be authorized for the reception of FSS emissions from geostationary satellites on a secondary basis. In this band, ESIMs may also be authorized for the reception of FSS emissions from non-geostationary-satellites on a secondary basis, subject to the condition that non-geostationary-satellite systems not cause unacceptable interference to, or claim protection from, geostationary-satellite networks.

(e) In the bands 18.8–19.3 GHz and 28.6–29.1 GHz, ESIMs may be authorized to communicate with both geostationary and non-geostationary satellites, subject to the condition that geostationary-satellite networks may not cause unacceptable interference to, or claim protection from, non-geostationary satellite systems in the fixed-satellite service.

(f) In the 19.3–19.4 GHz, and 19.6–19.7 GHz bands, ESIMs may be authorized for the reception of FSS emissions from non-geostationary satellites, subject to the conditions that these earth stations may not claim protection from transmissions of nonFederal stations in the fixed service and not cause unacceptable interference to, or claim protection from, geostationary-satellite networks.

* * * * *

PART 25—SATELLITE COMMUNICATIONS

■ 3. The authority citation for part 25 continues to read as follows:

Authority: 47 U.S.C. 154, 301, 302, 303, 307, 309, 310, 319, 332, 605, and 721, unless otherwise noted.

■ 4. Amend § 25.103 by revising the definitions of “Earth Station on Vessel,” “Earth Stations Aboard Aircraft,” and “Vehicle-Mounted Earth Station” to read as follows:

§ 25.103 Definitions.

* * * * *

Earth Station on Vessel (ESV). An earth station onboard a craft designed for traveling on water, receiving from and transmitting to Fixed-Satellite Service space stations.

Earth Stations Aboard Aircraft (ESAA). An earth station operating aboard an aircraft that receives from and transmits to Fixed-Satellite Service space stations.

* * * * *

Vehicle-Mounted Earth Station (VMES). An earth station, operating from a motorized vehicle that travels primarily on land, that receives from and transmits to Fixed-Satellite Service space stations and operates within the United States.

§ 25.115 [Amended]

■ 5. Amend § 25.115, as proposed to be amended on June 16, 2017 at 82 FR 27652, by revising paragraph (f) and adding paragraph (o) to read as follows:

* * * * *

(f) *NGSO FSS earth stations in 10.7–30.0 GHz.* (1) An application for an NGSO FSS earth station license in the 10.7–30.0 GHz band must include the certification described in § 25.146(a)(2).

(2) Individual or blanket license applications may be filed for operation in the 10.7–12.7 GHz, 14–14.5 GHz, 17.8–18.6 GHz, 18.8–19.4 GHz, 19.6–20.2 GHz, 28.35–29.1 GHz, or 29.5–30.0 GHz bands; however, blanket licensing in the 10.7–11.7 GHz, 17.8–18.3 GHz, 19.3–19.4 GHz, and 19.6–19.7 GHz bands is on an unprotected basis with

¹² 5 U.S.C. 603(c)(1)–(c)(4).

respect to current and future systems operating in the fixed service.

(3) Individual license applications only may be filed for operation in the 12.75–13.15 GHz, 13.2125–13.25 GHz, 13.75–14 GHz, or 27.5–28.35 GHz bands.

* * * * *

(o) The requirements in this paragraph apply to applications for ESIMs operation with NGSO satellites in the Fixed-Satellite Service, in addition to the requirements in paragraphs (a)(1), (a)(5), (e)(2), and (i) of this section:

(1) An exhibit describing the geographic area(s) in which the ESIMs will operate.

(2) The point of contact information referred to in § 25.228(e)(2), (f), or (g)(1) as appropriate.

(3) Applicants for ESIMs that will exceed the guidelines in § 1.1310 of this chapter for radio frequency radiation exposure must provide, with their environmental assessment, a plan for mitigation of radiation exposure to the extent required to meet those guidelines.

■ 6. Amend § 25.202 by removing and reserving paragraph (a)(8), revising paragraph (a)(10)(ii), and removing and reserving paragraph (a)(11) to read as follows:

§ 25.202 Frequencies, frequency tolerance, and emission limits.

(a) * * *

(10) * * *

(ii) The following frequencies are available for use by Earth Stations in Motion (ESIMs) communicating with NGSO FSS space stations, subject to the provisions in § 2.106 of this chapter:

10.7–11.7 GHz (space-to-Earth)
11.7–12.2 GHz (space-to-Earth)
14.0–14.5 GHz (Earth-to-space)
17.8–18.3 GHz (space-to-Earth)
18.3–18.6 GHz (space-to-Earth)
18.8–19.3 GHz (space-to-Earth)
19.3–19.4 GHz (space-to-Earth)
19.6–19.7 GHz (space-to-Earth)
19.7–20.2 GHz (space-to-Earth)
28.35–28.6 GHz (Earth-to-space)
28.6–29.1 GHz (Earth-to-space)
29.5–30.0 GHz (Earth-to-space)

* * * * *

■ 7. Amend § 25.228, as proposed to be added on June 16, 2017 at 82 FR 27652, by revising the introductory text of paragraph (j) to read as follows:

§ 25.228 Operating and coordination requirements for earth stations in motion (ESIMs).

* * * * *

(j) The following requirements govern all ESIMs transmitting to GSO or non-

GSO satellites in the Fixed-Satellite Service in the 14.0–14.5 GHz band.

* * * * *

BILLING CODE 6712–01–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

[Docket No. FWS–R4–ES–2018–0074; 4500030113]

RIN 1018–BD43

Endangered and Threatened Wildlife and Plants; Section 4(d) Rule for Trispot Darter

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), propose a rule under section 4(d) of the Endangered Species Act of 1973 (Act), as amended, for the trispot darter (*Etheostoma trisella*), a fish from Alabama, Georgia, and Tennessee. This rule would provide measures necessary and advisable to conserve the species, which we list as a threatened species under the Act in a separate rulemaking published in today's **Federal Register**.

DATES: We will accept comments received or postmarked on or before February 26, 2019. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. Eastern Time on the closing date. We must receive requests for public hearings, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT** by February 11, 2019.

ADDRESSES: You may submit comments by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: <http://www.regulations.gov>. In the Search box, enter FWS–R4–ES–2018–0074, which is the docket number for this rulemaking. Then, click on the Search button. On the resulting page, in the Search panel on the left side of the screen, under the Document Type heading, click on the Proposed Rule box to locate this document. You may submit a comment by clicking on “Comment Now!”

(2) *By hard copy:* Submit by U.S. mail or hand-delivery to: Public Comments Processing, Attn: FWS–R4–ES–2018–0074, U.S. Fish and Wildlife Service, MS: BPHC, 5275 Leesburg Pike, Falls Church, VA 22041–3803.

We request that you send comments only by the methods described above. We will post all comments on <http://www.regulations.gov>. This generally means that we will post any personal information you provide us (see **INFORMATION REQUESTED**, below, for more information).

FOR FURTHER INFORMATION CONTACT: Bill Pearson, Field Supervisor, U.S. Fish and Wildlife Service, Alabama Ecological Services Field Office, 1208 Main Street, Daphne, AL 36526; telephone 251–441–5181; facsimile 251–441–6222. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 800–877–8339.

SUPPLEMENTARY INFORMATION:

Previous Federal Actions

On October 4, 2017, we published a proposed rule in the **Federal Register** (82 FR 46183) to list the trispot darter as a threatened species under the Act (16 U.S.C. 1531 *et seq.*). Please refer to that proposed rule for a detailed description of previous Federal actions concerning this species, as well as information on the trispot darter's taxonomy, habitat, life history, historical and current distribution, population estimates, and status, and a summary of factors affecting the species. In addition, a thorough review of the taxonomy, life history, and ecology of the trispot darter is presented in the species status assessment (SSA) report, available on <http://www.regulations.gov> under Docket No. FWS–R4–ES–2018–0074.

Elsewhere in today's **Federal Register**, we publish (1) a final rule to list the trispot darter as a threatened species under the Act (“final listing rule”), and (2) a proposed rule to designate critical habitat for the trispot darter under the Act.

Background

The trispot darter is a freshwater fish found in the Coosa River System, above the fall line in the Ridge and Valley ecoregion of Alabama, Georgia, and Tennessee. This fish has a historical range from the middle to upper Coosa River Basin with recorded collections in tributaries to the Oostanaula, the mainstem Coosa, the Conasauga, and the Coosawattee Rivers, and their tributaries. Currently, the trispot darter is known to occur in Little Canoe Creek and tributaries (Coosa River), Ballplay Creek tributaries (Coosa River), Conasauga River and tributaries, and Coosawattee River and one tributary.

The trispot darter is a small-bodied, fish ranging in size from 1.3 to 1.6 inches (in) (3.3 to 4.1 centimeters (cm))
