SUPPLEMENTARY INFORMATION:

I. Background

The Chief Evaluation Office (CEO), in collaboration with the Employment and Training Administration (ETA), of DOL seeks to build evidence about effective approaches to prepare Americans with skills and connect them to well-paying, middle- and high-skilled, and high growth jobs in H–IB industries (such as IT, healthcare, advanced manufacturing, financial services, and broadband). There is a particular interest in learning about approaches to serving populations and individuals who have traditionally faced barriers to training and employment opportunities such as youth and young adults, parents with childcare needs, individuals with disabilities, individuals with limited English proficiency, and individuals with criminal records. The evaluation will advance the evidence on innovative approaches being used to meet these goals in the TechHire Partnership (TechHire) and Strengthening Working Families Initiative (SWFI) grant programs. The evaluation will include two components, an implementation study and an impact study.

The goal of the impact study is to provide rigorous evidence on the effectiveness of strategies used in the TechHire and SWFI grant programs. The impact study will consist of both a randomized controlled trial (RCT) and a quasi-experimental design (QED) evaluation. Approximately five grantees will be selected to participate in an RCT. The QED will include all 53 TechHire and SWFI grantees and use the pooled RCT control group as the comparison group using propensity score matching. The QED will collect data from an existing wage record data. It will also use data from the implementation study (described below)
