Any person desiring to intervene or to protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) on or before 5 p.m. Eastern time on the specified comment date. It is not necessary to separately intervene again in a subdocket related to a

compliance filing if you have previously intervened in the same docket. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant. In reference to filings initiating a new proceeding, interventions or protests submitted on or before the comment deadline need not be served on persons other than the Applicant.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 14 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First St. NE., Washington, DC 20426.

The filings in the above proceedings are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive e-mail notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please e-mail FERCOnlineSupport@ferc.gov or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

excluding legal holidays. The telephone number for the Reading Room is (202) 566-1744, and the telephone number for the Enforcement and Compliance Docket and Information Center Docket is: (202) 566-1752.

Use EPA's electronic docket and comment system at <http://www.regulations.gov> to submit or view public comments, access the index listing of the contents of the public docket, and to access those documents in the public docket that are available electronically. When in the system, select "search," then key in the docket ID number identified above.

Any comments related to this ICR should be submitted to EPA and OMB within 30 days of this notice. EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing at <http://www.regulations.gov> as EPA receives them and without change, unless the comment contains copyrighted material, Confidential Business Information (CBI), or other information whose public disclosure is restricted by statute. When EPA identifies a comment containing copyrighted material, EPA will provide a reference to that material in the version of the comment that is placed in <http://www.regulations.gov>. The entire printed comment, including the copyrighted material, will be available in the public docket. Although identified as an item in the official docket, information claimed as CBI, or whose disclosure is otherwise restricted by statute, is not included in the official public docket, and will not be available for public viewing at <http://www.regulations.gov>. For further information about the electronic docket, go to <http://www.regulations.gov>.

Title: NESHAP for Municipal Solid Waste Landfills (Renewal).

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for municipal solid waste landfills were proposed on November 7, 2000, and promulgated on January 16, 2003. These standards apply to each existing and new municipal solid waste (MSW) landfills. This subpart applies to a MSW landfill that has accepted waste since November 8, 1987 or has additional capacity for waste deposition, a major source, collocated with a major source, and an area source landfill with a design capacity equal to or greater than 2.5 million megagrams (Mg) and 2.5 million cubic meters (m³), and has estimated uncontrolled emissions equal to or greater than 50 megagrams per year (Mg/yr) of nonmethane organic compounds (NMOC), or a MSW landfill that has

accepted waste since November 8, 1987 or has additional capacity for waste deposition, that includes a bioreactor, is a major source, collocated with a major source, and an area source with a design capacity equal to or greater than 2.5 million Mg and 2.5 million m³ that is not permanently closed as of January 16, 2003.

Owners or operators of the affected facilities would be required to submit semiannual compliance reports for control device operating parameters prepare a startup, shutdown, and malfunction (SSM) plan and prepare semiannual SSM reports.

Any owner or operator subject to the provisions of this subpart must maintain a file of these measurements, and retain the file for at least two years following the collection of such measurements, maintenance reports, and records. All reports are sent to the delegated state or local authority. In the event that there is no such delegated authority, the reports are sent directly to the regional EPA office.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The OMB Control Numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15, and are identified on the form and/or instrument, if applicable.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average five hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owner or operator of each municipal solid waste landfill.

Estimated Number of Respondents: 1,121.

Frequency of Response: On occasion, semi-annually, and annually.

Estimated Total Annual Hour Burden: 18,234 hours.

Estimated Total Annual Costs: \$1,489,837, which includes \$0 annualized capital/startup costs, \$17,000 annual O&M costs, and \$1,472,837 annual labor costs.

Changes in the Estimates: There was a decrease of 21,126 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. The adjustment decrease in burden from the most recently approved ICR is due to a decrease in the number of sources. After we conducted a thorough analysis with the municipal solid waste landfills industry and obtained their spreadsheet that depicts MSW landfills whose capacity met or exceeded 2.5 million Mg, we were able to determine that there are 1,119 active landfills with a projection of one additional landfill per year over the next three years, for a total average of 1,121, as compared to 1,330 in the previous ICR. In addition, the startup, shutdown and malfunction plan has been completed for existing facilities. This only applies to a facility when it first becomes subject to the standard. The plans were completed, by in large, during the last ICR cycle.

The capital/startup costs are not included because this NESHAP does not require MSW landfills to purchase or operate additional control equipment or monitoring devices.

Dated: February 7, 2006.

Oscar Morales,

Director, Collection Strategies Division.
