

requirements. Annual Data Report forms will be forwarded by NIH/ORDA to investigators. Data submitted in these reports will be evaluated by the RAC, NIH/ORDA, and the FDA and reviewed by the RAC at its next regularly scheduled meeting."

OMB's "Mandatory Information Requirements for Federal Assistance Program Announcements" (45 FR 39592, June 11, 1980) requires a statement concerning the official government programs contained in the Catalog of Federal Domestic Assistance. Normally, NIH lists in its announcements the number and title of affected individual programs for the guidance of the public. Because the guidance in this notice covers not only virtually every NIH program but also essentially every Federal research program in which DNA recombinant molecule techniques could be used, it has been determined not to be cost effective or in the public interest to attempt to list these programs. Such a list would likely require several additional pages. In addition, NIH could not be certain that every Federal program would be included as many Federal agencies, as well as private organizations, both national and international, have elected to follow the NIH Guidelines. In lieu of the individual program listing, NIH invites readers to direct questions to the information address above about

whether individual programs listed in the Catalog of Federal Domestic Assistance are affected.

*Proposed Project:* Drug And Alcohol Services Information System —Revision—The DASIS consists of three related data systems: the National Facility Register, the Uniform Facility Data Set, and the Treatment Episode Data Set. Together, they provide information on the location, scope and characteristics of all known drug and alcohol treatment and prevention facilities in the United States, and the characteristics of clients receiving services. This information is needed to assess the nature and extent of these resources, to identify gaps in services, and to provide a database for treatment referrals. The FY 1996 DASIS was approved under OMB control number 0930-0168. This request is for continuation of DASIS with minor revisions to the data collection instruments. Automated data collection methods are employed by DASIS. The total annual burden estimate is 87,278 hours, as shown below:

	Number of respondents	Number of responses per respondent	Average burden per response (hours)	Total burden (hours)
States .....	56	591	2.386	78,973
Facilities .....	19,400	1	0.428	8,305
