### Office of Surface Mining Reclamation and Enforcement

#### Availability of Final Supplemental Environmental Impact Statement

**AGENCY:** Office of Surface Mining  
Reclamation and Enforcement,  
Department of the Interior.

**ACTION:** Notice of availability of a final  
supplemental environmental impact  
statement (EIS) for the proposed mining  
plan and permit application, Fence Lake  
Mine, Catron and Cibola Counties, New  
Mexico and Apache County, Arizona,  
OSM-EIS-31.

**SUMMARY:** The Office of Surface Mining  
Reclamation and Enforcement (OSM) is  
making available a final supplemental  
environmental impact statement (EIS)  
on the proposed mining plan and permit  
application for the Fence Lake mine.  
This is a supplemental EIS to the 1990  
Bureau of Land Management EIS, and it  
updates the identified impacts and  
analyzes any new probable impacts of  
mining at the proposed Fence Lake  
mine. The supplemental EIS has been  
prepared to assist the Department of the  
Interior in making a decision on the  
mining plan and permit application  
submitted by Salt River Project (SRP) for  
a surface coal mining operation located  
approximately 14 miles northwest of  
Quemado, New Mexico; and for 13  
miles of railroad in the State of Arizona.  
**ADDRESSES:** Copies of the final  
supplemental EIS may be obtained from  
Richard J. Seibel, Regional Director,  
Western Regional Coordinating Center,  
Office of Surface Mining Reclamation  
and Enforcement, 1999 Broadway, Suite  
3320, Denver, Colorado 80202-5733,  
Attn: Dr. Robert H. Block.

**FOR FURTHER INFORMATION CONTACT:**  
Dr. Robert H. Block, Project Manager  
and EIS Team Leader at the Denver,  
Colorado, location given under  
**ADDRESSES** (telephone: 303-672-5610).

**SUPPLEMENTARY INFORMATION:** SRP's  
proposed Fence Lake mine consists of  
Federal, State and private coal leases  
situated on approximately 18,000 acres  
northwest of Quemado, New Mexico.  
The proposed mine would remove  
approximately 81.3 million tons of coal,

by surface methods, over the 50 year  
life-of-mine. Approximately 1.8 million  
tons of coal would be removed each  
year from year 2 through year 28 and  
about 3 million tons of coal per year  
would be removed each year from year  
29 through year 40. The project also  
includes a proposed 44-mile railroad  
corridor that would be constructed west  
from the mine to supply coal to the  
existing Coronado Generating Station,  
located approximately 6 miles from St.  
Johns, Arizona.

OSM has prepared the supplemental  
EIS to evaluate the alternative actions  
that the Department could take on the  
mining plan in the state of New Mexico  
and the permitting of the 13 miles of  
railroad corridor in the State of Arizona.  
In accordance with the New Mexico  
State Program, the New Mexico Mining  
and Minerals Department must take  
permitting actions on the proposed  
surface coal mining operation and 31  
miles of railroad corridor within the  
State of New Mexico. Two alternatives  
are evaluated in the supplemental EIS:  
(1) approval of the mining plan and  
permit application with conditions, and  
(2) disapproval of the mining plan and  
permit application. OSM has identified  
"approval of the proposed mining plan  
and permit application package with  
conditions" as the preferred alternative.

Dated: March 22, 1996.

Richard J. Seibel,  
*Regional Director, Western Regional  
Coordinating Center.*
