

FOR FURTHER INFORMATION CONTACT: For information about the purpose or subject matter of the hearing, call or write Elizabeth Leland, Directorate for Economic Analysis, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 504-0962, extension 1321. For information about the schedule for submission of written comments, requests to make oral presentations, and submission of summaries of oral presentations and the text of prepared remarks, call or write Rockelle Hammond, Office of the Secretary, Consumer Product Safety Commission, Washington, DC 20207; telephone (301) 504-0800, extension 1232.

SUPPLEMENTARY INFORMATION: In the Federal Register of October 24, 1995 (60 FR 54478) the Commission announced that it would conduct a public hearing on January 23, and 24, 1996, to receive scientific, medical, and other technical information about carbon monoxide (CO) detectors and a voluntary standard for CO detectors.

Because of the government shutdown, the Commission has rescheduled that hearing to February 21, and 22, 1996. The Commission has extended the date to request opportunity to make oral presentations and to submit written comments concerning CO detectors to February 1, 1996. Persons who have submitted requests to make an oral presentation and a summary of the presentation in response to that notice need not submit a new request and summary.

The Commission seeks information relevant to several unresolved questions about CO detectors, including:

- What is the appropriate scope and purpose of a voluntary standard for CO detectors?
- What are the effects of exposure to CO, including exposure at low levels, to healthy individuals and to individuals who might be especially susceptible to the effects of CO?
- What are the anticipated "normal" levels of CO in the ambient air inside and outside the home?
- What factors should determine the mandatory activation and mandatory resistance level of CO for CO detectors; what level of CO should activate a detector's alarm; at what level of CO should a CO detector resist activation of the alarm?
- What is the relative reliability of the various CO sensor technologies now available?

For additional information about the purpose and scope of the hearing and the kinds of information sought by the Commission, see the Federal Register notice of October 24, 1995.

The Commission will establish time limits for all presentations, and may impose further limitations on presentations to avoid duplication. At the conclusion of each oral presentation, the Commissioners and selected staff members may question speakers.

Dated: January 19, 1996.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.
