The ACIP is used to help make AIP fund allotment decisions for each airport/development type. Funds are allotted to regions through two mechanisms: Commitments and Priorities. Commitments are projects that are believed to merit funding regardless of their relative priority calculation. These projects typically include Letters of Intent (LOI) and "phased" projects where it is important to complete a development program to derive an acceptable level of benefit for both the airport and the national system. Funds for Commitment projects are "set aside" for each airport/development category. The remainder of the available discretionary funds are distributed to the highest priority projects which remain unfunded in the ACIP. Priority distribution uses a priority "cut-off" for each airport/development category.
