

is limited to locations that are capable and equipped to deal with these types of shipments. The same comment feels that this rule will invalidate the Motor Vehicle Inspection, DD Form 626. DD Form 626 represents the condition of the equipment at the time of inspection at the origin activity and allows the Government to compare the origin inspection with the destination inspection to establish liability. Once the carrier equipment leaves the activity, the potential for change to the equipment remains, regardless of whether the shipment is transloaded. With this rule, the carrier accepts liability for shipment integrity, to include blocking and bracing. Another comment suggests requiring carriers to notify both origin and destination activities of seal changes. The rules publications allow adequate notification by requiring carriers to annotate seal changes on the Government Bill of Lading. To comply with another comment that this rule should clarify the meaning of "proper blocking and bracing," MTMC will add to the end of the rule the words "equal to or exceeding the standard used by the consignor." MTMC expects that in transloading a shipment, the carrier maintains shipment integrity at a level that is the same as or better than the consignor's. Transloading less-than-truckload shipments is an accepted practice. MTMC has considered all comments carefully and decided to implement the proposed change to its transloading procedures. If there are concerns regarding these procedures, the consignor has the option to select Exclusive Use of Vehicle service.
