#### **Aspergillus flavus AF 36; Establishment of Temporary Exemption from the Requirement of a Tolerance**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has established a temporary exemption from the requirement of a tolerance for residues of the microbial pesticide *Aspergillus flavus* AF 36 in or on the raw agricultural commodity cotton.

**DATES:** This temporary exemption from the requirement of a tolerance expires May 20, 1999.

**FOR FURTHER INFORMATION CONTACT:** By mail: Shanaz Bacchus, Biopesticides and Pollution Prevention Division (7501W) Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Fifth Floor, Crystal Station 1, 2800 Crystal Drive, Arlington, VA, (703) 308-8097; e-mail: bacchus.shanaz@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** Inter-Regional Research Project No. 4, New Jersey Agricultural Experiment, Rutgers Cook College, P.O. Box 231, New Brunswick, NJ 08903, has requested in pesticide petition PP 5E4575, the establishment of an exemption from the requirement of a tolerance for residues

of the microbial pesticide *Aspergillus flavus* AF 36 in or on the raw agricultural commodity cotton. This temporary exemption from the requirement of a tolerance will permit the marketing of the above raw agricultural commodity when treated in accordance with the provisions of experimental use permit 69224-EUP-1, which is being issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (Pub. L. 95-396, 92 Stat. 819; 7 U.S.C. 136).

The scientific data reported and other relevant material were evaluated, and it was determined that the exemption from the requirement of a tolerance will protect the public health. Therefore, the temporary exemption from the requirement of a tolerance has been established on the condition that the pesticide be used in accordance with the experimental use permit and with the following provisions:

1. The total amount of the active ingredient to be used must not exceed the quantity authorized by the experimental use permit.

2. Inter-Regional Research Project No. 4, must immediately notify the EPA of any findings from the experimental use permit that have a bearing on safety. The company must also keep records of production, distribution, and performance and on request make the records available to any authorized officer or employee of the EPA or the Food and Drug Administration.

This temporary exemption from the requirement of a tolerance expires May 20, 1999. Residues remaining in or on the raw agricultural commodity after this expiration date will not be considered actionable if the pesticide is legally applied during the term of, and in accordance with, the provisions of the experimental use permit and temporary exemption from the requirement of a tolerance. This temporary exemption from the requirement of a tolerance may be revoked if the experimental use permit is revoked or if any experience with or scientific data on this pesticide indicate that such revocation is necessary to protect the public health.

The Office of Management and Budget has exempted this notice from the requirement of section 3 of Executive Order 12866.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial
