### Approval and Promulgation of Implementation Plans; Approval of Revisions to the State Implementation Plan; Georgia

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA is approving the State Implementation Plan (SIP) revision submitted by the State of Georgia through the Department of Natural Resources, Environmental Protection Division (GA EPD) for the purpose of deleting the volatile organic compound (VOC) reasonably available control technology (RACT) rule for Perchloroethylene Dry Cleaners. In the final rules section of this Federal Register, the EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to that direct final rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

**DATES:** To be considered, comments must be received by July 29, 1996.

**Standards of Performance for New Stationary Sources for Nonmetallic Mineral Processing Plants; Amendments**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule and notice of public hearing.

**SUMMARY:** This action proposes revisions and clarifications to several provisions of the standards of performance for nonmetallic mineral processing plants, which were promulgated in the Federal Register on August 1, 1985 (50 FR 31328). On January 26, 1995, the National Stone Association petitioned EPA to review the existing standards. These revisions are in keeping with President Clinton's Regulatory Reinvention Initiative. The intended effect of this action is to reduce the costs of emission testing and reporting and recordkeeping. The affected industries and numerical emission limits remain unchanged

except for individual, enclosed storage bins.

A public hearing will be held, if requested, to provide interested persons an opportunity for oral presentation of data, views, or arguments concerning the proposed revised standards.

**DATES:** *Comments.* Comments must be received on or before August 26, 1996.

*Public Hearing.* If anyone contacts EPA requesting to speak at a public hearing by July 23, 1996, a public hearing will be held on August 5, 1996 beginning at 10 a.m. Persons interested in attending the hearing should call Ms. Cathy Coats at (919) 541-5422 to verify that a hearing will be held.

*Request to Speak at Hearing.* Persons wishing to present oral testimony must contact EPA by July 23, 1996 (contact Ms. Cathy Coats at (919) 541-5422.)

**ADDRESSES:** *Comments.* Comments should be submitted (in duplicate if possible) to: The Air and Radiation Docket and Information Center (MC-6102), ATTN: Docket No. A-95-46, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460.

Commenters wishing to submit proprietary information for consideration should clearly distinguish such information from other comments, and clearly label it "Confidential Business Information." Submissions containing such proprietary information should be sent directly to the following address, and not to the public docket, to ensure that proprietary information is not inadvertently placed in the docket: Attention: Mr. William Neuffer, c/o Ms. Melva Toomer, U.S. EPA Confidential Business Information Manager, OAQPS/MD-13; Research Triangle Park, North Carolina 27711. Information covered by such a claim of confidentiality will be disclosed by the EPA only to the extent allowed and by the procedures set forth in 40 CFR Part 2. If no claim of confidentiality accompanies a submission when it is received by the EPA, the submission may be made available to the public without further notice to the commenter.

*Docket.* Docket No. A-95-46, containing supporting information used in developing the proposed revisions is available for public inspection and copying between 8:00 a.m. and 4:00 p.m., Monday through Friday, at the Air and Radiation Docket and Information Center (MC-6102), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460; telephone (202) 260-7548, fax (202) 260-4000. **SUPPLEMENTARY INFORMATION:**

**Regulated Entities**

Entities potentially regulated by EPA's final action on this proposed rule are new, modified, or reconstructed affected facilities in nonmetallic mineral processing plants. These categories and entities include:

Category	Examples
Industry ....	Crushed and broken stone, sand and gravel, clay, rock salt, gypsum, sodium compounds, pumice, gilsonite, talc and pyrophyllite, boron, barite, fluorospar, feldspar, diatomite, perlite, vermiculite, mica, kyanite processing plants

This table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by final action on this proposal. This table lists the types of entities that EPA is now aware could potentially be regulated by final action on this proposal. Other types of entities not listed in the table could also be regulated. To determine whether your facility is regulated by final action on this proposal, you should carefully examine the applicability criteria in § 60.670 of the rule. If you have questions regarding the applicability of this action to a particular entity, consult the person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

**I. Background.**

Standards of performance for nonmetallic mineral processing plants were promulgated in the Federal Register on August 1, 1985 (50 FR 31328). These standards implement section 111 of the Clean Air Act and require all new, modified, and reconstructed nonmetallic mineral processing plants to achieve emission levels that reflect the best demonstrated system of continuous emission
