

based upon the test period cost of service and the projected throughput quantities employed in its filing, Paiute projected a deficiency of approximately \$6,882,430 in annual revenues under its existing rates. Paiute is therefore proposing to increase rates for its jurisdictional transportation and storage service in an amount that is sufficient to eliminate the revenue deficiency, and to recover the full cost of service reflected in its filing.

Paiute indicates that the principal items of cost changes producing its deficiency are: (1) increases in plant and related items; (2) increases in depreciation expenses; (3) increases in various operation and maintenance expenses; and (4) increases in the required rate of return and related income taxes. Paiute further indicates that in designing its proposed transportation rates, it has utilized the same straight fixed-variable method of rate design, cost classification, and cost allocation that was used to derive its present transportation rates in Docket No. RP93-6-000.

Paiute states that its proposed tariff sheets are submitted to revise its Statement of Rates tariff sheet and to make clarifications to its interruptible transportation revenue crediting mechanism.

Paiute states that it has served copies of its filing on all affected customers and all interested State Regulatory Commissions.

Any person desiring to be heard or to protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.214 and 385.211 of the Commission's Rules of Practice and Procedure. All such motions or protest must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

July 9, 1996.

Take notice that on July 1, 1996, Tennessee Gas Pipeline Company (Tennessee), a Delaware corporation, Post Office Box 2511, Houston, Texas 77252, filed a request with the Commission in Docket No. CP96-607-000, pursuant to Sections 157.205, and 157.212(a) of the Commission's Regulations under the Natural Gas Act (NGA) for authorization to install a new delivery point located on Tennessee's system in Montgomery County, Texas, for Hughes Natural Gas, Inc.
