The mission of the Defense Science Board is to advise the Secretary of Defense through the Under Secretary of Defense for Acquisition and Technology on scientific and technical matters as they affect the perceived needs of the Department of Defense. At these meetings the Task Force will assess the ability of automatic/aided target recognition technology and systems to support important military missions, principally in the near- and mid-term. The Task Force should concentrate on those technologies and systems that use imagery (EO, IR or radar) as their primary input medium.

In accordance with Section 10(d) of the Federal Advisory Committee Act, P.L. No. 92–463, as amended (5 U.S.C. App. II, (1994)), it has been determined that these DSB Task Force meetings concern matters listed in 5 U.S.C. 552b(c)(1) (1994), and that accordingly these meetings will be closed to the public.

SYSTEM LOCATION:

Department of Defense Radiation Experiments Command Center, 6801 Telegraph Road, Alexandria, VA 22310–3398; and the Office of the Under Secretary of Defense for Acquisition and Technology, Assistant to the Secretary of Defense (Atomic Energy), 3010 Defense Pentagon, Washington, DC 20301–3010.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Individuals who were or may have been the subject of tests involving ionizing radiation or other human-subject experimentation; individuals who have inquired or provided information to the Department of Energy Helpline or the Department of Defense Human Radiation Experimentation Command Center concerning such testing.

Military and DoD civilian personnel who participated in atmospheric nuclear testing between 1945 and 1962 or the occupation of Hiroshima and Nagasaki are already included in the Defense Special Weapons Agency's Nuclear Test Personnel Review (NTPR) program and are not part of this effort. The Defense Nuclear Agency's system of records notice that covers the NTPR is HDSWA 010, entitled Nuclear Test Participants. However, inquiries referred from the Helpline that later are determined to fall within this category will be included in the system.

CATEGORIES OF RECORDS IN THE SYSTEM:

Information in the system includes an individual's name, Social Security Number or service number, last known or current address, occupational

information, dates and extent of involvement in an experiment, exposure data, medical data, medical history of subject and relatives, and other documentation of exposure to ionizing radiation or other agents.

The system contains information abstracted from historical records, and information furnished to the Department of Defense, Department of Energy or other Federal Agencies by affected individuals or other interested parties.

Records include human radiation experimentation conducted from 1944 to the present. However, experiments conducted after May 20, 1974 (the date of issuance of the Department of Health, Education and Welfare Regulations for the Protection of Human Subjects, 45 CFR part 46), may be covered by other systems of records.

Common and routine medical practices, such as established diagnostic and treatment methods involving incidental exposures to ionizing radiation are not included within this system.

Examples of such methods are panorex radiographs for dental evaluations and thyroid scans for the evaluation and treatment of hypo/hyperthyroidism.
