

of Congress and are available upon request. The purpose of the Coordinating Committee is to assist EPA in the development of regulations to control emissions of air pollutants from industrial, commercial, and institutional combustion of fuels and non-hazardous solid wastes. The Coordinating Committee will attempt to develop recommendations for national emission standards for hazardous air pollutants (NESHAP) implementing section 112 and solid waste combustion regulations implementing section 129 of the Act, and may review and make recommendations for revising and developing new source performance standards (NSPS) under section 111 of the Act. The regulations will cover boilers, process heaters, industrial/commercial and other (non-hazardous) waste incinerators, stationary internal combustion engines, and stationary gas turbines.

The Coordinating Committee will provide a means for considering important regulatory issues and building stakeholder consensus on these issues prior to proposal. The Coordinating Committee will establish Work Groups as necessary to fulfill these objectives. The Coordinating Committee approach will lead to better regulations and is consistent with agency initiatives to use flexible, common-sense approaches, avoid duplication, and involve stakeholders in the regulatory process.

The Coordinating Committee will coordinate information collection and analysis for the various combustion source categories and make recommendations on all aspects of the regulation including, but not limited to, applicability, definitions, emissions limitations, testing, monitoring, recordkeeping, and reporting requirements. The Coordinating Committee shall hold meetings, collect and analyze information, analyze issues, conduct reviews, perform studies, produce reports, and make regulatory recommendations. In developing regulatory recommendations, the Coordinating Committee will strive to reach consensus, where consensus is defined as a recommendation that all parties can accept or support, although it may not be their first choice. If consensus is not reached, the Coordinating Committee shall report majority and minority recommendations to EPA. The EPA retains its full and independent decision-making authority and responsibility. A consensus-based recommendation to EPA will, however, be given great consideration in these decisions.

The Coordinating Committee likely will need several closely-spaced meetings during the initial phases of the Industrial Combustion Coordinated Rulemaking. After that, regular quarterly meetings may be sufficient. The FACA requires that these meetings be open to the public and that there be an opportunity for interested persons to file comments before or after meetings, or to make statements as permitted by the Coordinating Committee's guidelines and to the extent time permits. In accordance with these requirements, the first and subsequent meetings of the Coordinating Committee will be open to the public. Any comments can be sent to the docket at the address listed under "Inspection of Documents".

Dated: July 26, 1996.
