ACTION: Notice.

SUPPLEMENTARY INFORMATION:

I. Background

The data submitted annually on the ETA 204 report enables the Employment and Training Administration to project revenues for the Unemployment Insurance program on a State by State basis and to measure the variations in assigned contribution rates which result from different experience rating systems. Used in conjunction with other data, the ETA 204 assists in determining the effects of certain factors (e.g., seasonably, stabilization, expansion, or contraction in employment, etc.) on the employment experience of various groups of employers. The data also provide an early signal for potential solvency problems, are useful in analyzing factors which give rise to these potential problems, and permit an evaluation of the effectiveness of the various approaches available to correct the detected problems. Further, the data are the basis for determining the Experience Rating Index; the index allows for the evaluation of the extent to which UI benefits in States are effectively charged, noncharged, and ineffectively charged.

II. Current Actions

The change being proposed in this request for extension will alter Section C of the report, All Taxable Subject Accounts, Selected Data by Experience Factor, standardizing it with a uniform format for all States. The change will require that States report the distribution of their employers according to fixed, standardized, experience factor intervals. Presently, States are allowed wide discretion in setting these intervals when submitting Section C. Informal queries of State personnel have indicated that, since Section C is presently tabulated electronically, the programming required to conform to standardized experience factor intervals would consist of modifications to software already in use. This change will allow
