DATES: The publication of this notice in the Federal Register will segregate the public lands described above to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. As provided by the regulations of 43 CFR 2201.1(b), any subsequently tendered application, allowance of which is discretionary, shall not be accepted, shall not be considered as filed and shall be returned to the applicant. The segregative effect of this notice will terminate upon issuance of patent or in two years, whichever occurs first.

ADDRESSES: Detailed information concerning the exchange is available for review at the Idaho Falls Bureau of Land Management Office, 1405 Hollipark Dr., Idaho Falls, Idaho 83401.

SUPPLEMENTARY INFORMATION: The purpose of the land exchange is to facilitate more efficient management of the public lands through consolidation of ownership and to benefit the public interest by obtaining important resource values. The exchange is consistent with the local Bureau of Land Management's land use plans and the public interest will be well served by making this exchange. An environmental assessment, prepared to analyze impacts of the proposed exchange, is available for public review.

The value of the lands to be exchanged will be of equal value. Acreages will be adjusted to equalize values upon completion of a final appraisal of both the state and BLM-administered public lands.

The exchange will be subject to:

1. All valid existing rights, including any rights-of-way, easements, permits, or lease of record.

2. A reservation to the United States of a right-of-way for ditches and canals constructed by the authority of the United States under the Act of August 30, 1890 (43 U.S.C. 945).

3. A recreational easement over and across a 100 foot strip parallel to the high water line of the left bank of the

Snake River along Lots 9 and 10, T. 2 N., R. 37 E., B.M.

For a period of 45 days from the date of publication of this notice in the Federal Register interested parties may submit comments to the District Manager at the above address. Objections will be reviewed by the State Director who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Dated: August 12, 1996.

Joe Kraayenbrink,

Area Manager, Medicine Lodge Resource Area.

Minerals Management Service

Agency Information Collection Activities: Submission for Office of Management and Budget Review; Comment Request

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of extension for five currently approved information collections.

SUMMARY: The Department of the Interior has submitted five proposals for the collections of information listed below to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act of 1995 (Act). The Act provides that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

ADDRESSES: Submit comments and suggestions directly to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for the Department of the Interior (1010-0044, 1010-0045, 1010-0046, 1010-0039, or 1010-0017), Washington, DC 20503.

Send a copy of your comments to the Chief, Engineering and Standards Branch, Mail Stop 4700, Minerals Management Service, 381 Elden Street, Herndon, Virginia 20170-4817.

FOR FURTHER INFORMATION CONTACT: Alexis London, Engineering and Standards Branch, Mail Stop 4700, Minerals Management Service, 381 Elden Street, Herndon, Virginia 22070-4817; telephone (703) 787-1600. You may obtain copies of the proposed collection of information and related forms by contacting MMS's Clearance Officer at the telephone number listed below.

SUPPLEMENTARY INFORMATION:

Titles: Application for Permit to Drill, Form MMS-123; Sundry Notices and Reports on Wells, Form MMS-124; Well Summary Report, Form MMS-125; Well Potential Test Report and Request for Maximum Production Rate (MPR), Form MMS-126; and Semi-Annual Well Test Report, Form MMS-128.

OMB Control Numbers (Form Numbers): 1010-0044 (MMS-123); 1010-0045 (MMS-124); 1010-0046 (MMS-125); 1010-0039 (MMS-126); 1010-0017 (MMS-128).

Abstract: Section 3506 of the Act (44 U.S.C. Chapter 35) requires that OMB provide interested Federal agencies and the public an opportunity to comment on information collection requests.

The Outer Continental Shelf Lands Act (OCSLA), 43 U.S.C. 1331 *et seq.*, requires the Secretary of the Interior to preserve, protect, and develop oil and gas resources in the OCS; make such resources available to meet the Nation's energy needs as rapidly as possible; balance orderly energy resources development with protection of the human, marine, and coastal environment; ensure the public a fair and equitable return on the resources offshore; preserve and maintain free enterprise competition, and ensure that the extent of oil and natural gas resources of the OCS is assessed at the earliest practicable time. To carry out these responsibilities, the MMS issued rules governing oil and gas and sulphur operations in the OCS. These rules and the associated information collection requirements are contained in 30 CFR Part 250, Subpart D, Drilling Operations; Subpart E, Well-Completion Operations; Subpart F, Well-Workover Operations; Subpart G, Abandonment of Wells; Subpart K, Production Rates; and Subpart P, Sulphur Operations. Various sections of these Subparts require lessees to submit several MMS forms.

Failure to collect this information would prevent the Director from carrying out the mandate of the OCSLA and implementing the provisions contained in 30 CFR Part 250. The following explains how MMS uses the information collected and the consequences if MMS did not collect the information.

a. Form MMS-123, Application for Permit to Drill: MMS uses the information to determine the conditions of a drilling site in order to avoid hazards inherent in drilling operations and to decide whether the drilling operations are safe and environmentally sound. If MMS did not collect this information, we could not ensure that drilling operations were planned to

minimize the risks to personnel and the environment.

b. Form MMS-124, Sundry Notices and Reports on Wells: MMS District Supervisors use the information to evaluate the adequacy of the equipment, materials, and/or procedures that the lessee plans to use for drilling, production, well-completion, and well-workover operations. These include deepening and plugging back and well-abandonment operations, including temporary abandonments where the wellbore will be reentered and completed or permanently abandoned. If MMS did not collect this information, we could not review lessee plans to require changes to drilling procedures or equipment to ensure that levels of safety and environmental protection are maintained. Nor could we review information concerning requests for approval or subsequent reporting of well-completion or well-workover operations to ensure that procedures and equipment are appropriate for the anticipated conditions.

c. Form MMS-125, Well Summary Report: MMS District Supervisors use the information to ensure that they have accurate data on the wells under their jurisdiction and to ensure compliance with approved plans. It is also used to evaluate remedial action in well-equipment failure or well-control loss situations.

d. Form MMS-126, Well Potential Test Report and Request for Maximum Production Rate (MPR): MMS District Supervisors use this form to determine the MPR for an oil or gas well. The form contains information concerning the conditions and results of a well-potential test. This requirement carries out the conservation provisions of the OCSLA and 30 CFR Part 250. Failure to collect this information could result in waste of energy resources in the OCS by production at imprudent rates, jeopardizing the ultimate full recovery of hydrocarbons.

e. Form MMS-128, Semi-annual Well Test Report: MMS Gulf of Mexico and Pacific Regional Supervisors use this information to evaluate the results of well tests to find out if reservoirs are being depleted in a way that will lead to the greatest ultimate recovery of hydrocarbons. The form is designed to present current well data on a semiannual basis to allow the updating of permissible producing rates and to provide the basis for estimates of currently remaining recoverable gas reserves.

Description of Respondents: Federal OCS oil and gas lessees.

Frequency: Forms MMS-123, MMS-124, MMS-125, and MMS-126, are on

occasion; Form MMS-128 is semi-annual.

Estimated Number of Respondents: 130 respondents for each form.

Estimate of Annual Burden:

MMS-123 1,013 responses @ 2 hrs per response = 2,026 hours.

MMS-124 9,950 responses @ 1 hr per response = 9,950 hours.

MMS-125 2,118 responses @ 1 hr per response = 2,118 hours.

MMS-126 4,040 responses @ 1.4 hr per response = 5,656 hours.

MMS-128 1,716 responses @ 2 hrs per response = 3,432 hours.

Comments: The OMB is required to make a decision concerning the proposed collection of information between 30 and 60 days after publication of this notice in the Federal Register. Therefore, a comment to OMB is best ensured of having its full effect if OMB receives it within 30 days of publication.

Bureau Clearance Officer: Carole deWitt (703) 787-1242.

Dated: July 11, 1996.

Henry G. Bartholomew,
Deputy Associate Director for Operations and Safety Management.
