

No comments objecting to the proposal were received. Designations for Class E airspace extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9C dated August 17, 1995, and effective September 16, 1995. The Class E airspace designation listed in this document will be published subsequently in the Order.

#### The Rule

This amendment to Part 71 of the Federal Aviation Regulations (14 CFR part 71) modifies Class E airspace at Tampa, FL, to accommodate a GPS RWY 18 SIAP and for IFR operations at the Vandenberg Airport. The operating status of the airport will change from VFR to include IFR operations concurrent with publication of this SIAP.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### Amendment to Class E Airspace; Smithfield, NC

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment modifies the Class E airspace area at Smithfield, NC, as a result of an airspace review conducted to accommodate an amendment to the LOC/DME RWY 3 Standard Instrument Approach Procedure (SIAP) for the Smithfield/Johnston County Airport. Less controlled airspace extending upward from 700 feet above the surface (AGL) is needed to accommodate this SIAP and for instrument flight rules (IFR) operations at the airport.

**EFFECTIVE DATE:** 0901 UTC, December 5, 1996.

#### SUPPLEMENTARY INFORMATION:

##### History

On July 10, 1996, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by modifying Class E airspace at Smithfield, NC (61 FR 36314). This action would provide adequate Class E airspace for IFR operations at the Smithfield/Johnston County Airport.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Designations for Class E airspace extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9C dated August 17, 1995, and effective September 16, 1995. **Amendment to Class E Airspace;  
Rochester, MN**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action amends Class E airspace at Rochester, MN. Additional controlled airspace is required for the Copter GPS 326 degrees approach to St. Mary's Hospital Heliport. Controlled airspace extending upward from 700 to 1200 feet above ground level (AGL) is needed to contain aircraft executing the approach. The intended affect of this action is to provide segregation of aircraft using instrument approach procedures in instrument conditions from other aircraft operating in visual weather conditions.

**SUPPLEMENTARY INFORMATION:****History**

On Wednesday, May 29, 1996, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) to amend Class E airspace at Rochester, MN (61 FR 26855). The proposal was to add controlled airspace extending upward from 700 to 1200 feet AGL to contain Instrument Flight Rules (IFR) operations in controlled airspace during portions of the terminal operation and while transiting between the enroute and terminal environments.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class E airspace designations for areas extending upward from 700 feet or more above the surface of the earth are published in paragraph 6005 of FAA Order 7400.9C dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

**The Rule**

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) amends Class E airspace at Rochester, MN to accommodate IFR, operators executing the Copter GPS 326 degrees approach procedure to St. Mary's Hospital Heliport. Controlled airspace extending upward from 700 to 1200 feet AGL is needed to contain aircraft executing the approach. The area will be depicted on appropriate aeronautical charts thereby enabling pilots to circumnavigate the area or otherwise comply with IFR procedures.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a

substantial number of small entities under the criteria of the Regulatory Flexibility Act.
