**ACTION:** Notice of receipt of application for modification 1 to scientific research permit 943 (P430A).

**SUMMARY:** Notice is hereby given that Thomas Savoy of Connecticut Department of Environmental Protection (P430A) has applied in due form for modification 1 to scientific research permit 943 to take listed shortnose sturgeon.

**DATES:** Written comments or requests for a public hearing on this modification request must be received on or before October 7, 1996.

**ADDRESSES:** The application, permit, and related documents are available for review by appointment in the following offices:

Office of Protected Resources, F/PR8, NMFS, 1315 East-West Hwy., Room 13307, Silver Spring, MD 20910-3226 (301-713-1401); and

Written comments, or requests for a public hearing on this application should be submitted to the Chief, Endangered Species Division, Office of Protected Resources.

**SUPPLEMENTARY INFORMATION:** Thomas Savoy (P430A) requests modification 1 under the authority of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217-227). The applicant is currently authorized to collect, handle, and tag 800 shortnose sturgeon (*Acipenser brevirostrum*) per year in the Connecticut River, within the boundaries of the State of Connecticut. These sturgeon are captured using gillnets, trammel nets, and trawls; then measured, weighed, sexed when possible, and examined for condition, deformities, and previous tags. All fish that do not already have a PIT tag receive one in the musculature on the left side under the dorsal fin. Ten fish may receive a radio or sonic transmitter. The purpose of the research is to determine current numbers, locations, and movement patterns of shortnose sturgeon within the Connecticut River..

The purpose of the modification request is to test theories and gain information on spawning and migration. This permit expires March 31, 2000, and all numbers listed below are for take authorized annually. The applicant has requested three changes to the permit. First, he wishes to change his take authorization from 800 adult shortnose sturgeon to 400 adult shortnose sturgeon and 100 juvenile shortnose sturgeon. In addition, the applicant wishes to have the authorization to lethally take 150 shortnose sturgeon larvae and 150 shortnose sturgeon eggs. Second, the applicant wishes to increase the number of shortnose sturgeon to be tagged with a radio or sonic transmitter from 10 to 25. Third, the applicant wishes to expand the location of his study on the Connecticut River, to include southern Massachusetts south of the Holyoke Dam.

Those individuals requesting a hearing should set out the specific reasons why a hearing on this particular modification request would be appropriate (see **ADDRESSES**). The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in this application summary are those of the applicant and do not necessarily reflect the views of NMFS.

Dated: August 29, 1996.
