

Factors Considered

The environmental assessment carefully considered a wide variety of factors including, but not limited to: the physical environment, consisting of geology, soils, hydrology, air quality and noise; the biological environment including vegetation, wildlife, fisheries, and threatened, endangered, or sensitive species; the social environments consisting of land-use, recreation, visual resources, and cultural resources. The environmental assessment also considered the project purpose, alternatives, environmental consequences, cumulative impacts and other related information.

Environmental Justice

In addition to the analysis conducted in accordance with NEPA, the Department of State addressed environmental justice considerations pursuant to Executive Order 12898 of February 11, 1994 ("Federal Actions to address Environmental Justice in Minority Populations and Low-Income Populations"). Based on its examination of environmental justice considerations, the Department has determined that the proposed pipeline will not have disproportionately high and adverse human health or environmental effects on minority and low-income populations. The analysis supporting this determination can be obtained from the State Department Office of International Energy and Commodities Policy, 202-647-2887.
