[I.D. 091296A]

RIN 0648-A161

**Fisheries of the Exclusive Economic Zone Off Alaska; Individual Fishing Quota Program; Sweep-up Adjustments**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of availability of amendments to fishery management plans; request for comments.

**SUMMARY:** The North Pacific Fishery Management Council (Council) has submitted Amendment 43 to the Fishery Management Plan (FMP) for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (BSAI) and Amendment 43 to the FMP for Groundfish of the Gulf of Alaska (GOA) and a regulatory amendment to the halibut Individual Fishing Quota (IFQ) regulations. This action is necessary to increase the consolidation ("sweep-up") levels for small quota share (QS) blocks for Pacific halibut and sablefish managed under the IFQ program. This action is intended to maintain consistency with the objectives of the IFQ program (i.e., prevent excessive consolidation of QS, maintain diversity of the fishing fleet, and allow new entrants into the fishery), while increasing the program's flexibility by allowing a moderately greater amount of QS to be swept-up into amounts that can be fished more economically.

**DATES:** Comments on the FMP amendments must be received by November 12, 1996.

**ADDRESSES:** Comments on the proposed FMP amendments must be submitted to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, NMFS, 709 West 9th Street, Room 453, Juneau, AK 99801, or P.O. Box 21668, Juneau, AK 99802, Attn: Lori J. Gravel. Copies of the proposed amendments

and the Environmental Assessment/Regulatory Impact Review (EA/RIR) prepared for the amendments may be obtained from the North Pacific Fishery Management Council, 605 West 4th Avenue, Anchorage, AK 99510.

**FOR FURTHER INFORMATION CONTACT:** John Lepore, 907-586-7228.

**SUPPLEMENTARY INFORMATION:** The Magnuson Fishery Conservation and Management Act (Magnuson Act) requires that each Regional Fishery Management Council submit any fishery management plan or plan amendment it prepares to NMFS for review and approval, disapproval, or partial disapproval. The Magnuson Act also requires that NMFS, upon reviewing the

plan or amendment, must immediately publish a notice that the plan or amendment is available for public review and comment.

Amendments 43/43 would increase the sweep-up levels for small QS blocks for Pacific halibut and sablefish from the current 1,000 lb (0.45 metric tons (mt)) maximum for Pacific halibut and 3,000 lb (1.4 mt) maximum for sablefish to a 3,000 lb (1.4 mt) maximum and a 5,000 lb (2.3 mt) maximum, respectively. Two other changes were recommended to accompany these increases. First, the base year total allowable catch (TAC) for determining the pounds would be the 1996 TAC, rather than 1994 TAC, which was used for the first sweep-up levels. Second,

once QS levels are established for the appropriate regulatory areas based on the 1996 TAC, those QS levels would be fixed and codified. This would eliminate any confusion as to the appropriate sweep-up level in pounds, which would fluctuate with changes in the annual TAC.

NMFS will consider the public comments received during the comment period in determining whether to approve the proposed amendments.

Dated: September 13, 1996.

Gary Matlock,

*Director, Office of Sustainable Fisheries,  
National Marine Fisheries Service.*
