NATIONAL SCIENCE FOUNDATION

Advisory Panel for Cell Biology; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub.L. 92-463, as amended), the National Science Foundation announces the following meeting.

Name: Advisory Panel for Cell Biology (1136)—(Panel A).

Date and Time: October 23-25, 1996, 8:30 a.m. to 6:00 p.m.

Place: Room 380, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Persons: Dr. Barbara Zain, Program Director for the Cell Biology Program, National Science Foundation, Room 655 South, Arlington, VA 22230. Telephone: 703/306-1442.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate research proposals submitted to the Signal Transduction Program as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a

proprietary or confidential nature, including technical information; financial data, such as salaries and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: October 1, 1996.

M. Rebecca Winkler,
Committee Management Officer.

NEIGHBORHOOD REINVESTMENT CORPORATION

Sunshine Act Meeting; Regular Meeting of the Board of Directors

TIME & DATE: 2:00 P.M., Thursday, October 17, 1996.

PLACE: Neighborhood Reinvestment Corporation, 1325 G Street, N.W., Suite 800, Board Room, Washington, D.C. 20005.

STATUS: Open.

CONTACT PERSON FOR MORE INFORMATION: Jeffrey T. Bryson, General Counsel/Secretary, 202/376-2441.

AGENDA:

- I. Call to Order
- II. Approval of Minutes: July 31, 1996, Regular Meeting
- III. Treasurer's Report
- IV. Executive Director's Quarterly Management Report
- V. Adjourn

Jeffery T. Bryson,
General Counsel/Secretary.

BILLING CODE 7570-01-M

NUCLEAR REGULATORY COMMISSION

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: U. S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review of continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: 10 CFR 35.32 and 35.33

“Quality Management Program and Misadministrations”.

2. Current OMB approval number: 3150-0171.

3. How often the collection is required: For quality management program (QMP):

Reporting: One time submittal of a quality management program (QMP) for each existing and new licensee, when the QMP is modified, or when new modalities (uses) are added to an existing license.

Ten Agreement States, who should have adopted the rule by January 1995, have not done so. Therefore, this estimate includes the one-time burden for the development of QMPs by these ten Agreement State licensees.

Recordkeeping: Records of written directives, administered dose or dosage, annual review, and recordable events, for 3 years.

For Misadministrations:

Reporting: Whenever a misadministration occurs.

Recordkeeping: Records of misadministrations for 5 years.

4. Who is required or asked to report: NRC Part 35 licensees who use byproduct material in limited diagnostic and therapeutic ranges and similar type of licensees regulated by Agreement States.

5. The number of respondents: 6300 licensees.

6. The number of hours needed annually to complete the requirement or request: 34,743 hours for applicable licensees (24,400 hrs/yr for reporting and 10,343 hrs/yr for recordkeeping).

7. Abstract: In the medical use of byproduct material, there have been instances where byproduct material was not administered as intended or was administered to a wrong individual, which resulted in unnecessary exposures or inadequate diagnostic or therapeutic procedures. The most frequent causes of these incidents were: insufficient supervision, deficient procedures, failure to follow procedures, and inattention to detail. In an effort to reduce the frequency of such events, the NRC requires licensees to implement a quality management program (§ 35.32) to provide high confidence that byproduct material or radiation from byproduct material will be administered as directed by an authorized user physician.

Collection of this information enables the NRC to ascertain whether misadministrations are properly identified, evaluated, and investigated by the licensee and that corrective action is taken. Additionally, NRC has a responsibility to inform the medical community of generic issues identified

in the NRC review of misadministrations.

Submit, by December 6, 1996, comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the burden estimate accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection be minimized, including the use of automated collection techniques or other forms of information technology?

A copy of the draft supporting statement may be viewed free of charge at the NRC Public Document Room, 2120 L Street NW, (lower level), Washington, DC. Members of the public who are in the Washington, DC, area can access this document via modem on the Public Document Room Bulletin Board (NRC's Advanced Copy Document Library), NRC subsystem at FedWorld, 703-321-3339. Members of the public who are located outside of the Washington, DC, area can dial FedWorld, 1-800-303-9672, or use the FedWorld Internet address: fedworld.gov (Telnet). The document will be available on the bulletin board for 30 days after the signature date of this notice. If assistance is needed in accessing the document, please contact the FedWorld help desk at 703-487-4608.

Additional assistance in locating the document is available from the NRC Public Document Room, nationally at 1-800-397-4209, or within the Washington, DC, area at 202-634-3273.

Comments and questions about the information collection requirements may be directed to the NRC Clearance Officer, Brenda Jo. Shelton, U.S. Nuclear Regulatory Commission, T-6 F33, Washington, DC, 20555-0001, or by telephone at (301) 415-7233, or by Internet electronic mail at BJS1@NRC.GOV.

Dated at Rockville, Maryland, this 18th day of October, 1996.

For the Nuclear Regulatory Commission.
Gerald F. Cranford,
Designated Senior Official for Information Resources Management.

BILLING CODE 7590-01-P

[Docket Nos. 50-424 and 50-425]

Georgia Power Company, et al.; Notice of Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 96 to Facility Operating License No. NPF-68 and Amendment No. 74 to Facility Operating License No. NPF-81 issued to Georgia Power Company, et al. (the licensee), which revised the Technical Specifications and associated Bases for operation of the Vogtle Electric Generating Plant, Units 1 and 2, located in Burke County, Georgia.

The amendments are effective as of the date of issuance and shall be implemented within 150 days from the date of issuance. Implementation shall include the relocation of Technical Specification requirements to the appropriate licensee-controlled document as identified in the licensee's application dated May 1, 1995, as supplemented by letters dated August 3 and 9, September 22, November 20, and December 21, 1995, January 26 and 30, February 19 and 29, March 5 and 12, May 6, June 17, August 23, and September 13, 1996, and reviewed in the staff's Safety Evaluation dated

The amendments replaced, in its entirety, the current Technical Specifications and associated Bases with a set based on NUREG-1431, "Standard Technical Specifications, Westinghouse Plants," Revision 1, dated April 1995.

There are three specific items in the licensee's application that are still being reviewed by the staff. Two of these items are the allowed outage time (AOT) for the emergency diesel generators (EDGs) and the AOT for the containment spray system. In accordance with supplements to the initial application, these two items are being addressed in the license amendments by retaining the provisions of the licensee's current licensing basis. New licensing actions are being initiated as a means for continuing the staff evaluation of the AOT proposals. Appropriate license amendments will be issued when those reviews are completed.

The third item concerns the staff evaluation of the licensing basis for containment isolation valves in closed systems. The licensee's current licensing basis is being retained pending the resolution of an unresolved inspection item. Any changes needed to Technical Specification 3.6.3 as a result of that review will be addressed in a future licensing action. The licensee

will be kept informed of the status of that review in separate correspondence.

All other issues in the licensee's application for Technical Specification conversion are resolved in the license amendments.

The application for the amendments, dated May 1, 1995, as supplemented by letters dated August 3 and 9, September 22, November 20, and December 21, 1995, January 26 and 30, February 19 and 29, March 5 and 12, May 6, June 17, August 23, and September 13, 1996, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments.

Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for a Hearing in connection with this action was published in the Federal Register on September 7, 1995 (60 FR 46633) and on January 10, 1996 (61 FR 734). No request for a hearing or petition for leave to intervene was filed following these notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of the amendment will not have a significant effect on the quality of the human environment (61 FR 8308).

For further details with respect to the action see (1) the application for amendments dated May 1, 1995, as supplemented by letters dated August 3 and 9, September 22, November 20, and December 21, 1995, January 26 and 30, February 19 and 29, March 5 and 12, May 6, June 17, August 23, and September 13, 1996, (2) Amendment No. 94 to License No. NPF-68 and Amendment No. 72 to License No. NPF-81, (3) the Commission's related Safety Evaluation dated September 25, 1996, and (4) the Commission's Environmental Assessment dated February 27, 1996.

All of these items are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street NW., Washington, DC, and at the local public document room located at the Burke County Library, 412 Fourth Street, Waynesboro, Georgia.

Dated at Rockville, Maryland, this 25th day of September 1996.
