

At the four projects with juvenile fish transportation facilities, a small percentage of adult salmon that pass each project move back downstream by entering the juvenile fish bypass systems. The adult fish that cross the juvenile fish separators at each project are bypassed back to the river to continue their migration. Passing the adults from the separators usually requires some handling of the fish or delays in adult fish passage through the facilities. An increase in the annual indirect take of adult, ESA-listed, Snake River fall chinook salmon is requested because the Corps anticipates larger adult fall chinook salmon runs, earlier migrating runs, and/or an increase in the incidence of adult salmon fallbacks. Modification 2 is requested for the duration of the permit. Permit 895 expires on December 31, 1998.

Those individuals requesting a hearing should set out the specific reasons why a hearing on this application would be appropriate (see **ADDRESSES**). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in this application summary are those of the applicant and do not necessarily reflect the views of NMFS.
