Utilities shall provide a cable television system operator no less than 60 days written notice prior to (1) removal of facilities or termination of any service to those facilities, such removal or termination arising out of a rate, term or condition of a cable television pole attachment agreement, or (2) any increase in pole attachment rates. The Commission was required to establish a Petition for Stay process for the action contained in the notice. The Commission was required to establish a complaint resolution process regarding pole attachments. The Commission was required to establish a certification process for states to use to make notice of their authority to regulate the rates, terms and conditions for pole attachments. The provisions in Section 224 were initially only applicable to cable television system operators. However, Section 703 of the Telecommunications Act of 1996 ("1996 Act") amends Section 224 to expand the scope of the pole attachment provisions to include telecommunications carriers as well as cable television system operators. Information collected as a result of pole attachment provisions has been used by the Commission to hear and resolve petitions for stay and complaints as mandated by Section 224. Information filed has been used to determine the merits of the petition and complaint. State certifications have been used to make public notice of the state's authority to regulate the rates, terms and conditions for pole attachments.
