Phase 2 of the NJAS will verify the generalized work behaviors across occupations identified from Phase 1, determine when the behaviors are first needed on the job and link the behaviors to organizational characteristics like high performance. The NJAS survey in Phase 2 will be sent to a group of approximately 6,000 job incumbents in 3,000 organizations. This survey will ask the job incumbents the frequency and importance of the behaviors, and the point at which the behaviors are first needed on the job. A separate survey, the High Performance Workplace Environmental Survey will also be sent to managers in the organizations sampled, asking about the structure, culture, climate, and characteristics of their organizations. Data analyses will provide information about how the behaviors from the NJAS survey are linked to various organizational characteristic and a list of generalized cross-occupational skills that can serve as a framework for creating assessments of workplace skills, classifying/reclassifying jobs, setting skill standards for industries, and determining what behaviors should be taught in school or on-the-job for use

by business, educational, community organizations and others interested in assessing the generalized work behaviors of their clients.

Theresa M. O'Malley,

Acting Departmental Clearance Officer.

Dale Electronics, Inc., Bradford Electronics, Bradford, Pennsylvania; Notice of Revised Determination on Reconsideration

On September 20, 1996, the Department issued a Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance, applicable to all workers of

Dale Electronics, Bradford Electronics located in Bradford, Pennsylvania. The notice will soon be published in the Federal Register.

By letter of September 27, 1996, the petitioners requested administrative reconsideration of the Department's findings. The petitioners presented new evidence that was not considered in the original determination. Additional new evidence was subsequently transmitted to the Department by officials of Dale Electronics in Bradford.

The workers at Dale Electronics produce electronic components. The initial TAA petition for workers at Dale Electronics was denied because criterion (3) of the Group Eligibility Requirements of the Trade Act of 1974 was not met. The subject firm did not import electronic components. Layoffs at the Bradford plant were attributable to the transfer of production to other domestic plants.

New findings on reconsideration show that the company does import electronic components.

Other new findings on reconsideration reveal that the company is shifting production of electronic components to their foreign manufacturing facilities and will import from those foreign locations.
