

Part II requires respondents to possess competent and reliable scientific evidence to substantiate claims that any smoking-cessation or cigarette-modification product: (A) reduces the amount of nicotine, tar, carbon monoxide, or any other component of cigarette smoke that smokers get from smoking a cigarette; (B) is effective in enabling or helping smokers to quit smoking; (C) reduces the risk of smoking-related health problems for smokers who continue to smoke; (D) reduces the amount of nicotine, tar, carbon monoxide, or any other component of cigarette smoke that smokers get without changing a cigarette's taste or draw; (E) is effective in enabling or helping smokers to quit smoking without withdrawal symptoms; or (F) provides immediate health benefits, such as reduced congestion, coughing or windedness, for smokers who continue to smoke. Part II also requires respondents to possess competent and reliable scientific evidence to substantiate claims that smokers using any such product will not compensate for the product's effects by increasing the number of cigarettes they smoke per day.

Part III requires respondents to possess competent and reliable scientific evidence to substantiate any performance, benefit or efficacy claims for smoking-cessation or cigarette-modification products.

Part IV prohibits the respondents from misrepresenting the existence, contents, validity, results, conclusions, or interpretations of any test or study.

Part V requires respondents either to possess competent and reliable scientific evidence to substantiate claims that any endorsement reflects the typical or ordinary experience of consumers who use the product; or to clearly and prominently disclose either: a) what the generally expected results would be, or b) that consumers should not expect to experience similar results.

Part VI requires respondents to send a postcard to identifiable past purchasers of PhaseOut notifying them of the Commission's action in this case and advising them that PhaseOut has *not* been proven to reduce the risk of smoking-related diseases or to make cigarettes "safer." Part VI also requires respondents to send a letter to their purchasers for resale requesting the names and addresses of their customers and notifying them that if the purchasers for resale do not stop using advertising and promotional materials containing claims covered by this order, the respondents are required to stop doing business with them. Part VII requires the respondents to maintain for

five years copies of all communications with consumers and purchasers for resale pursuant to the terms of Part VI.

The proposed order also requires respondents to maintain materials relied upon to substantiate the claims covered by the order, to distribute copies of the order to certain current officers and employees, to notify the Commission of any changes in corporate structure that might affect compliance with the order, and to file one or more reports detailing compliance with the order. The order also contains a provision stating that it will terminate after twenty (20) years absent the filing in federal court, by either the United States or the FTC, of a complaint against the respondents alleging a violation of the order.

The purpose of this analysis is to facilitate public comment on the proposed order, and it is not intended to constitute an official interpretation of the agreement and proposed order, or to modify any of their terms.

Donald S. Clark,
Secretary.
