

management plan incorporating the above prescriptions, as well as employee/contractor training, and maintenance of the permit's terms and conditions.

The EA considers the environmental consequences of two alternatives. The no action alternative would probably result in continued insidious and direct habitat loss for *Phaeognathus hubrichti* resulting in further jeopardy to the species and continued exposure of the Applicant under Section 9 of the Act. This action is inconsistent with the purposes and intent of Section 10 of the Act. The proposed action alternative is issuance of the incidental take permit. The issuance of the permit will be predicated on implementation of the Applicant's HCP, and the measures contained in the authorizing permit.

Dated: February 26, 1996.
