NUCLEAR REGULATORY COMMISSION

Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget (OMB) Review

AGENCY: Nuclear Regulatory Commission (NRC).

ACTION: Notice of the OMB review of information collection and solicitation of public comment. The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

SUMMARY: The NRC has recently submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

1. Type of submission, new, revision, or extension: Revision.
2. The title of the information collection: 10 CFR Part 75—Safeguards on Nuclear Material—Implementation of US/IAEA Agreement.
3. The form number if applicable: Not applicable.
4. How often the collection is required: Installation information is submitted upon written notification from the Commission. Changes are submitted as occurring. Nuclear Material accounting and control information is submitted in accordance with specified instructions.
5. Who will be required or asked to report: All persons licensed or certified by the Commission or Agreement States to possess source or special nuclear material at an installation specified on the U.S. eligible list as determined by the Secretary of State or his designee and filed with the Commission, as well as holders of construction permits and persons who intend to receive source material.

6. An estimate of the number of responses: One. The IAEA is currently expected to select one NRC-licensed facility for inspection in the next year.

7. The estimated number of annual respondents: One reporting and five recordkeeping. The NRC-licensed facility selected for inspection will be reporting design information. This facility and the five facilities selected pursuant to a separate protocol will maintain transfer and material balance records, but reporting to the IAEA will be through the U.S. State system (Nuclear Materials Management and Safeguards System).

8. An estimate of the total number of hours needed annually to complete the requirement or request: 4,848 (48 hours for reporting and 800 hours each for 6 recordkeepers).

9. An indication of whether Section 3507(d), Pub. L. 104-13 applies: Not applicable.

10. Abstract: 10 CFR Part 75 establishes a system of nuclear material accounting and control to implement the agreement between the United States and the International Atomic Energy Agency (IAEA). Under that agreement, NRC is required to collect the information and make it available to the IAEA. This submittal is a revision which reflects a reduction in burden because IAEA will only be selecting one NRC-licensed facility for inspection pursuant to § 75.41.
