Montana**

AGENCY: Butte District Office, Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare a Resource Management Plan Amendment.

SUMMARY: A Resource Management Plan Amendment/Environmental Assessment will be prepared to allocate resources and to designate management goals and guidelines for 11,730 acres of land along the lower Blackfoot River in Missoula County, Montana which are proposed for acquisition by exchange. The Garnet Resource Area Resource Management Plan (Garnet RMP), approved in 1986, provide for the disposal and acquisition

of lands by exchange based on a specific set of criteria and further, identified public lands for disposal based on this criteria.

Future management of the lands proposed for acquisition has been identified as an issue to be addressed in the Environmental Assessment for the proposed land exchange. Management Areas consistent with the Garnet RMP would be assigned to the lands proposed for acquisition. Thirteen Management Areas were described in the Garnet RMP and all public lands in the Resource Area were placed in one of these categories. Each Management Area places a specific emphasis on future land use and each provides broad direction for future management of the lands in each category.

DATES: A public scoping period will run until February 3, 1997. Comments may be submitted to the address listed below.

SUPPLEMENTARY INFORMATION: The San Francisco Bay/Sacramento-San Joaquin Delta Estuary (Bay-Delta system) is a critically important part of California's natural environment and economy. In recognition of the serious problems facing the region and the complex resource management decisions that must be made, the state of California and the Federal government are working together to stabilize, protect, restore, and enhance the Bay-Delta system. The State and Federal agencies with management and regulatory responsibilities in the Bay-Delta system are working together as CALFED to provide policy direction and oversight for the process.

One area of Bay-Delta management includes the establishment of a joint State-Federal process to develop long-term solutions to problems in the Bay-Delta system related to fish and wildlife, water supply reliability, natural disasters, and water quality. The intent is to develop a comprehensive and balanced plan which addresses all of the resource problems. This effort, the CALFED Bay-Delta Program (Program), is being carried out under the policy direction of CALFED. The CALFED Bay-Delta Program is exploring and developing a long-term solution for a cooperative planning process that will determine the most appropriate strategy and actions necessary to improve water quality, restore health to the Bay-Delta ecosystem, provide for a variety of beneficial uses, and minimize Bay-Delta system vulnerability. A group of citizen advisers representing California's agricultural, environmental, urban, business, fishing, and other interests who have a stake in finding long term solutions for the problems affecting the Bay-Delta system has been chartered under the Federal Advisory Committee Act (FACA) as the Bay-Delta Advisory Council (BDAC) to advise CALFED on the program mission, problems to be addressed, and objectives for the CALFED Bay-Delta Program. BDAC provides a forum to help ensure public participation, and will review reports and other materials prepared by CALFED staff. BDAC has established a subcommittee called the Ecosystem Roundtable to provide input on annual work plans to implement ecosystem restoration projects and programs.

Minutes of the meetings will be maintained by the CALFED Bay-Delta Program, Suite 1155, 1416 Ninth Street, Sacramento, CA 95814, and will be available for public inspection during regular business hours, Monday through Friday within 30 days following the meeting.
