General Wage Determination **Publication**

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the county.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487–4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the seven separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C. This 13 Day of March 1997.

John Frank,

Chief, Branch of Construction Wage Determinations.

Bureau of Labor Statistics

Proposed Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and

financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Bureau of Labor Statistics (BLS) is soliciting comments concerning the proposed reinstatement, with change, of the "Veterans Supplement to the Current Population Survey (CPS)."

A copy of the proposed information collection request (ICR) can be obtained by contacting the individual listed below in the addressee section of this notice.

DATES: Written comments must be submitted to the office listed in the addressee section below on or before May 20, 1997.

The Bureau of Labor Statistics is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

ADDRESSES: Send comments to Karin G. Kurz, BLS Clearance Officer, Division of Management Systems, Bureau of Labor Statistics, Room 3255, 2 Massachusetts Avenue, N.E., Washington, DC 20212. Ms. Kurz can be reached on 202–606–7628 (this is not a toll free number).

SUPPLEMENTARY INFORMATION:

I. Background

The data from the Veterans Supplement to the CPS provides estimates of the labor market characteristics of disabled and Vietnamtheater veterans, recently separated veterans, who feel their disability affects labor force participation, and veterans who have used special education and employment programs. The data will be used to plan and evaluate veterans' programs, for research on the employment status of veterans, and to

produce a legislatively-mandated labor market study of veterans.

II. Current Actions

Data from the September 1997 Veterans Supplement to the CPS are needed to produce a report to Congress, required every two years by Public Law 100–323 (amended by Public Law 103– 446), which relates to the labor market situation of various categories of veterans.

Type of Review: Reinstatement, with change.

Agency: Bureau of Labor Statistics. Title: Veterans Supplement to the Current Population Survey (CPS). OMB Number: 1220–0102.

Affected Public: Individuals or households.

Total Respondents 12,000. Frequency: Biennially. Total Responses: 12,000. Average Time Per Response: 1 minute.

Estimated Total Burden Hours: 200 hours.

Total Burden Cost (capital/startup): \$0.

Total Burden Cost (operating/maintenance): \$0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they also will become a matter of public record.

Signed at Washington, DC, this 17th day of March, 1997.

W. Stuart Rust, Jr.,

Acting Chief, Division of Management Systems, Bureau of Labor Statistics. [FR Doc. 97–7204 Filed 3–20–97; 8:45 am] BILLING CODE 4510–24–M

LIBRARY OF CONGRESS

Copyright Office

[Docket No. 97-2]

Registration Procedures

AGENCY: Copyright Office, Library of Congress.

ACTION: Notice of inquiry.

SUMMARY: The Copyright Office issues this Notice of Inquiry to seek information relating to the proposed adoption of a different design for certificates of registration issued through the Copyright Office Electronic Registration, Recordation, & Deposit System (CORDS). The considerable additional time and cost to program software to create certificates which identically reproduce the paper-based

system led the Copyright Office to consider alternatives.

DATES: Comments should be received on or before April 21, 1997.

ADDRESSES: Interested parties should submit 15 copies of their written comments to the Office of the General Counsel, Copyright GC/I&R, P.O. Box 70400, Southwest Station, Washington, D.C. 20024. Comments delivered by hand should be submitted to the Office of the General Counsel, Copyright Office, James Madison Memorial Building, Room 403, First Street and Independence Avenue, S.E., Washington, D.C. 20559–6000.

FOR FURTHER INFORMATION CONTACT: Marilyn J. Kretsinger, Assistant Gene

Marilyn J. Kretsinger, Assistant General Counsel, or Kent Dunlap, Principal Legal Advisor, Copyright GC/I&R, P.O. Box 70400, Southwest Station, Washington, D.C. 20024. Telephone: (202) 707–8380. Telefax: (202) 707– 8366.

SUPPLEMENTARY INFORMATION:

1. Background

One of the most significant responsibilities assigned to the Copyright Office by Title 17 of the U.S. Code is the registration of copyright claims. Sections 408–412 generally set forth the nature of the registration system. Central to the administration of this system is the issuance of certificates of registration, which are legal documents providing evidence of the validity of the copyright claim and the underlying facts.

The content of the application is determined by section 409, enumerating ten items of information relevant to the copyright claim and granting the Register of Copyrights discretion to require additional information.

Sections 410(a) and (c) primarily determine the nature of the certificate of registration. Section 410(a) authorizes the Register of Copyrights after examination to issue "a certificate of registration under the seal of the Copyright Office" containing "the information given in the application, together with the number and effective date of the registration." Section 410(c) provides: "In any judicial proceedings the certificate of a registration made before or within five years after first publication of the work shall constitute prima facie evidence of the validity of the copyright and of the facts stated in the certificate. The evidentiary weight to be accorded the certificate of a registration made thereafter shall be within the discretion of the court.'

2. The CORDS Registration System

The Copyright Office has always manually handled all of the materials submitted for copyright registration. A goal of CORDS is to develop and test an electronic system for copyright registration with copyright applications and copies of works transmitted in digital form over communications networks, such as the Internet. Signatures on these CORDS electronic claims will be digital rather than handwritten.

CORDS has been under development since 1993, as a joint project of the U.S. Copyright Office and the Library of Congress, working with the Corporation for National Research Initiatives (CNRI). Developing the testbed system with support from the Defense Advanced Research Projects Agency (DARPA) and the Library of Congress, CNRI is leading a national effort with the Copyright Office to develop an infrastructure for linking digital works. The Office proved the concept of CORDS electronic copyright registration and deposit with its initial test in 1996 using computer science technical reports from Carnegie Mellon University. Additional tests with other partners are planned for 1997.

CORDS will allow applicants to submit copyright applications and deposit their digitized works electronically. Claimants will prepare their applications, attach deposit materials in machine-readable format, "sign" their submissions using public key/private key encryption technology, and transmit applications and deposits to the Copyright Office over the Internet using Privacy Enhanced Mail.

The CORDS system will interface with three existing Copyright Office automated systems—COINS (the Copyright Office in-process tracking system), COPICS (Copyright Office **Publication and Interactive Cataloging** System) and CIS (the Copyright Imaging System, which produces copyright registration certificates). The new CORDS system automatically enters information into COINS (the tracking system), the remitter's deposit account is debited for the filing fee, and an inprocess tracking record (giving the status of the application, fee, and deposit) is created, all electronically.

In addition, using CORDS, the Copyright Office staff will complete examination and cataloging of the digital applications and works and enter data into COPICS (the cataloging system). Registration certificates will be issued through the Copyright Imaging System (CIS). The Office's digital repository will hold these digital

copyright deposits in a secure and verifiable manner.

In future test phases over the next few years, the Copyright Office will work with several other small groups of representative copyright owners. Subsequent phases of CORDS testing will receive and process selected applications and deposits in other formats of copyrighted works starting with a limited number of published textual works, some with graphics, then images, sound recordings, video, and other formats. These tests and modification phases will continue while the Internet environment itself is maturing.

3. The Current Process for Certificate

From 1978 to 1993, internal processing of applications and creation of certificates was done by hand. After the Examining Division cleared the claim for registration, a registration number was stamped on the application. A certificate was then created by photocopying the numbered application onto "certificate paper," paper printed with the Copyright Office seal and the signature of the Register of Copyrights appearing in the upper left corner. The certificate was then mailed to the applicant. See Copyright Office Announcement, Changes in Registration Procedures Effective January 1, 1978, ML-171. (Nov. 1977).

Since 1993, portions of the numbering and certification process have been automated. The numbering clerk enters the In-Process Number by wand; the system generates barcoded registration number labels that are placed on the application and deposit. The clerk then scans the numbered application into the Copyright Imaging System (CIS), which records a digital image of the application. CIS interfaces with COINS to verify the availability of the fee and record the registration number assigned to the claim. The system transmits the image to a printer, which reproduces the image onto the "certificate paper." The certificate is mailed to the applicant.

4. CORDS Certificates

The Office originally envisioned that certificates issued under CORDS would be identical to certificates issued through the paper-based system. In developing the system, however, programming problems in designing certificates that would accommodate the variations in classes of works made this goal costly to achieve. Therefore the Office designed a certificate which is identical to the current certificate in certain standard fields but which allows flexibility in other fields of information to accommodate the variations in

classes of works and information provided by the applicant.

The certificates produced from CORDS registration records would therefore be different in appearance than those produced from paper applications. All information provided by the applicant will be included in the certificate, in accordance with section 410(a) of the copyright law. However, where an item of non-essential information, such as a "previous or alternative title," is not provided by the applicant, the heading for that information would not appear. Headings for essential information, such as the "publication date," would appear even if left blank by the applicant. The

information would be presented in the same sequence in the CORDS certificates, but the individual fields would vary in length to optimize space and to keep all of the information of one type together (e.g., all titles listed together, all authors listed together, all claimants listed together). This system would also alleviate the need for continuation pages.

Two sample CORDS TX certificates reproduced as Appendix A and Appendix B illustrate the principles described above. Appendix A represents a simple claim and Appendix B a complicated claim that would have required a continuation sheet if filed using a printed form. Certain standard

items, *e.g.*, location of the seal, registration and effective date, and certificate address would appear in the same areas as they do on the printed forms.

5. Scope of Public Comments

The Copyright Office is interested in receiving public comments on domestic or international difficulties, if any, in the Office's plan for issuing such certificates of registration under CORDS.
