Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Operations Branch, ASO-530, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. The Proposal

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to amend Class D and E2 surface area airspace at Orlando, FL. to accommodate a GPS RWY 7 and a GPS RWY 25 SIAP's for the Orlando Executive Airport. Additional controlled airspace extending upward from the surface is needed to accommodate these SIAP's and for IFR operations at the airport. Class D airspace designations and Class E airspace designations for airspace areas designated as a surface area for an airport are published in Paragraphs 5000 and 6002, respectively, of FAA Order 7400.9D, dated September 4, 1996, and effective September 16, 1996, which are incorporated by reference in 14 CFR 71.1 The Class D and E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
