SUPPLEMENTARY INFORMATION:

I. Background

As part of the settlement in the case of NAACP v. Secretary of Labor (Civil Action No. 2010-72, U.S.D.C.), the U.S. Department of Labor (DOL) negotiated with the plaintiffs a series of regulations published June 10, 1980. Employment and Training Administration (ETA) regulations at 20 CFR 651, 653, and 658 under the Wagner-Peyser Act as amended by the Job Training Partnership Act, set forth the role and responsibilities of the United States Employment Services (USES) and the State Employment Service Agencies (SESA) regarding compliance of said regulations.

In compliance with 20 CFR 653.109, DOL established recordkeeping requirements to allow for the efficient and effective monitoring of SESAs regulatory compliance.

The ETA Form 8429, Employment Service Compliant Referral Record, is used to collect and document all individual complaints filed under the ES complaint system.

The ETA Form 5148, Services to Migrant and Seasonal Farmworkers Report, is used to collect data which are primarily used to monitor and to measure the extent and effectiveness of ES services to MSFWS as a high priority target group for ES services.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-297]

Notice of Renewal of Facility License No. R-120; North Carolina State University

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 11 to Facility License No. R-120 for the North Carolina State University (the licensee), which renews the license for operation of the PULSTAR Research Reactor

located on the licensee's campus in Raleigh, North Carolina.

The facility is a non-power reactor that has been operating at a power level not in excess of 1000 kilowatts (thermal). Renewed Facility License No. R-120 will expire 20 years from its date of issuance.

The amended license complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's regulations. The Commission has made appropriate findings as required by the Act and the Commission's regulations in 10 CFR Chapter I. Those findings are set forth in the license amendment.

Opportunity for hearing was afforded in the notice of the proposed issuance of this renewal in the **Federal Register** on December 28, 1988, at 53 FR 52535. No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

Continued operation of the reactor will not require alteration of buildings or structures, will not lead to significant changes in effluents released from the facility to the environment, will not increase the probability or consequences of accidents, and will not involve any unresolved issues concerning alternative uses of available resources. On the basis of the foregoing and on the Environmental Assessment, the Commission concludes that renewal of the license will not result in any significant environmental impacts.

The Commission has prepared a "Safety Evaluation Report Related to the Renewal of the Operating License for the Research Reactor at North Carolina State University" (NUREG-1572) for the renewal of Facility License No. R-120 and has, on the basis of that report, concluded that the facility can continue to be operated by the licensee without endangering the health and safety of the public.

The Commission also prepared an Environmental Assessment, which was published in the **Federal Register** on April 29, 1997 (62 FR 23280) for the renewal of Facility License No. R-120 and has concluded that this action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see (1) The application for amendment dated August 19, 1988, as supplemented on January 2, April 17, and December 18, 1989; April 17 and July 18, 1990; January 25, 1991; November 30, 1992; September 15, 1995; and October 4, November 25, and December 30, 1996; (2) Amendment No. 11 to Facility License No. R-120; (3) the related Safety Evaluation Report (NUREG-1572); and (4) the
