

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSF for financial support.

Agenda: To review and evaluate Unsolicited proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: May 5, 1997.

M. Rebecca Winkler,

Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Computer and Information Science and Engineering; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting:

Name: Advisory Committee for Computer and Information Science and Engineering—1115.

Date and Time: May 28, 1997; 8:30 a.m. to 5:00 p.m.; May 29, 1997; 8:30 a.m. to 2:30 p.m.

Place: National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230, Room 375.

Type of Meeting: Open.

Contact Person: Yvonne Summers, Office of the Assistant Director, Directorate for Computer and Information Science and Engineering, National Science Foundation, 4201 Wilson Blvd., Suite 1105, Arlington, VA 22230. Telephone: (703) 306-1900.

Minutes: May be obtained from the contact person listed above.

Purpose of Meeting: To advise NSF on the impact of its policies, programs and activities on the CISE community; to provide advice to the Assistant Director/CISE on issues related to long range planning, and to form ad hoc subcommittees to carry out needed studies and tasks.

Agenda

- (1) Review status of CISE Reorganization Plan
- (2) Review status of CISE Strategic Plan
- (3) Discuss special activities, e.g., Knowledge Distributed Intelligence (KDI, Government Performance and Results Act (GPRA), Partnership For Advanced Computational Infrastructure (PACI), etc.

Dated: May 5, 1997.

M. Rebecca Winkler,

Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Design, Manufacture, and Industrial Innovation; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting:

Name: Special Emphasis Panel in Design, Manufacture, and Industrial Innovation—(1194).

Date and Time: May 28, 1996, 7:45 a.m.–4:45 p.m.

Place: Rooms 320, and 330, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: Dr. Georgia-Anne Klutke, Program Director, Operations Research and Production Systems Program, (703) 306-1330, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to the NSF for financial support.

Agenda: To review and evaluate Operations Research and Production Systems unsolicited proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of proprietary or confidential nature, including technical information, financial data such as salaries, and personal information concerning individuals associated with the proposals. These matters that are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: May 5, 1997.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Mathematical and Physical Sciences; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting:

Name of Committee: Advisory Committee for Mathematical and Physical Sciences (Code 66).

Date and Time: May 27, 1997 8:00 am–5:30 pm; May 28, 1997 8:00 am–2:00 pm.

Place: Arlington Hilton Hotel, 950 North Stafford Street, Gallery 2, Arlington, VA 22203.

Type of Meeting: Open.

Contact Person: Adriaan de Graaf, Acting Executive Officer, MPS, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230 Telephone: (703) 306-1802.

Minutes: May be obtained from the contact person listed above.

Meeting Purpose: To provide advice on future science and education opportunities; on effective and efficient strategies and mechanisms for achieving overall disciplinary and multidisciplinary balance as well as balance with respect to support for individual investigators and groups, centers, and major facilities; on facilities planning; on the integration of research and education; and on the implementation of GPRA.

Agenda

May 27, 1997

AM

Introductory Remarks
State of MPS Address

Discussion of Science Opportunities
PM
Reports from MPS Working Groups on
Facilities and Instrumentation, and
University Industry Partnerships
Advisory Committee Working Group
Discussions

May 28, 1997

AM

Summaries of Advisory Committee
Working Group Discussions
Advisory Committee Recommendations
Meeting Wrap-up/Future Business
Dated: May 5, 1997.

M. Rebecca Winkler,

Committee Management Officer.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-31085; License No. 31-
28369-01 EA 97-019]

Roy Sadovsky, D.V.M. Floral Park, New York; Notice of Denial of License Renewal and Order Terminating License

I

Roy Sadovsky, D.V.M., (Licensee or Dr. Sadovsky) is the holder of Byproduct Nuclear Material License No. 31-28369-01 (License) issued by the Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR Part 30. The License authorizes possession and use of licensed material (i.e., gold-198 seeds) for implantation in horses for the treatment of leg injuries and diseases in accordance with the conditions specified therein. Condition 10 of the License requires that licensed material be used only at the Meadowlands Race Track in East Rutherford, New Jersey, or Showplace Farm and Gaitway Farm in Millstone Township, New Jersey. The License, originally issued on December 22, 1989, was amended on January 10, 1992, and was due to expire on January 31, 1995. The license has remained in effect, however, pursuant to 10 CFR 30.36(a), based on a request made by the Licensee in an application for renewal filed on January 24, 1995.

II

On August 26, and September 5, 1996, the NRC conducted an inspection at the Licensee's office in Elmont, New York, and at the Gaitway Farm in Millstone Township, New Jersey. During the inspection, it was determined that the Licensee had continued to use licensed radioactive material consisting of gold-198 seeds at White Birch Farm, in Allentown, New Jersey, a location not authorized by the license, despite being

cited for that violation in an NRC Notice of Violation (NOV) issued in January 1992, and despite informing the NRC in February 1992 that he would no longer use the material at the unauthorized location.

During the inspection, the NRC inspector determined, through review of records and interview of the Licensee, that Dr. Sadovsky continued to use gold-198 seeds at the White Birch Farm location on 15 occasions between 1992 and 1996. In addition to this finding of a deliberate violation of an NRC requirement, the August-September 1996 inspection also identified other violations of NRC requirements, each of which are documented in a related Notice of Violation and Proposed Imposition of Civil Penalty issued on this date. These violations include: (1) Failing to secure from unauthorized removal or access, licensed materials (approximately 120 millicuries of gold-198) that were stored in the Licensee's unlocked, open vehicle on September 5, 1996, as required by 10 CFR 20.1801 and 20.1802; (2) transporting licensed material in violation of 10 CFR 71.5 and the applicable requirements of the U.S. Department of Transportation regulations, including failure to use a Type A package as required by 49 CFR 173.415, failure to apply the radioactive material Yellow-II label as required by 49 CFR 172.403, and failure to describe the material on the shipping paper as required by 49 CFR 172.200; (3) failing to provide individual monitoring devices to personnel who assisted in the Licensee's use of licensed material, and to ensure the use of those devices by such personnel, when provided as required by Condition 15 of the License; and (4) conducting operations with licensed material (gold-198) in a manner that caused dose rates in an unrestricted area to exceed 2 millirem in any one hour, as prohibited by 10 CFR 20.1301(a)(2).

On September 13, 1996, the NRC issued an Order Suspending the License (Effective Immediately) and Demand for Information (DFI) to the Licensee, based on the findings of the inspection. As noted in the Order, the violations involving use of licensed material at White Birch Farm were apparently willful, in that the Licensee had been put on notice in 1992 that the license limited use of licensed material to only the locations authorized on the license, and was aware that this material was being used at Allentown, New Jersey, a location not authorized on the NRC license.

Subsequently, the NRC Office of Investigations conducted an investigation of this matter. The investigation determined that the

Licensee's use of gold-198 at an unauthorized location during the period from February 22, 1992, to October 19, 1994, was deliberate, and that the use of this licensed material at this location subsequent to January 1995 was willful.

By letter dated October 15, 1996, the Licensee responded to the Order and Demand for Information. In his response, the Licensee stated, among other things, that he did not willfully use licensed material at a location not authorized by his license and that he believed that his license had been amended to include use of licensed material at White Birch Farm. The Licensee repeated his position in a letter dated January 7, 1997.

On February 26, 1997, an enforcement conference was held with the Licensee. At the enforcement conference, the Licensee again denied that he had committed a willful violation of NRC requirements, and again maintained his belief that his license had been amended to authorize work at White Birch Farm.

Notwithstanding the Licensee's assertion, the NRC has concluded that the Licensee's action of performing licensed activity at White Birch Farm, an unauthorized location, was deliberate. This conclusion is supported by the fact that the Licensee used licensed material at White Birch Farm in February and March 1992, only a short time after he was put on notice by the Notice of Violation issued in January 1992 that such use was not authorized by his License. In addition, notwithstanding the Licensee's assertion that he believed that he had then submitted a license amendment to allow use of licensed material at White Birch Farm, this request was not submitted until January 1995.

III

Based on the above, the NRC has concluded that the Licensee deliberately violated NRC requirements. Furthermore, the additional violations, which were identified during the 1996 inspection, are of significant concern in that they have the potential to impact public health and safety. In particular, the radiation level from the quantity of gold-198 that the Licensee typically used is approximately 2.5 rem per hour at 10 centimeters and, when implanted in horses, the legs of the treated horses produce radiation levels of more than 200 millirem per hour at a distance of 30 centimeters. Given these radiation levels, the failure to provide and to ensure the use of individual monitoring by a worker raises a question as to
