#### **Prospective Grant of Limited Exclusive License: Radioimmunotherapy Utilizing Bismuth 213 and Monoclonal Antibodies Having Binding Specificity to Tag-72 and Human Carcinomas**

**AGENCY:** National Institutes of Health, Public Health Service, DHHS.

**ACTION:** Notice.

**SUMMARY:** This notice in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(i) that the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an exclusive world-wide license to practice the inventions embodied in U.S. Patent Applications SN 08/299,999 and corresponding foreign patent applications entitled, "Production Of A Single-Gene Encoded Immunoglobulin"; "Second Generation Monoclonal Antibodies Having Binding Specificity To Tag-72 And Human Carcinomas" (07/073,685, 07/547,336, now U.S. Patent 5,512,443, issued 4/30/96)", and U.S. Patent Application PHS Ref. No. D-001-96/0 "Humanized Monoclonal Antibodies Specific to TAG-72; Methods For Their Manufacture and Usage in The Treatment Or Diagnosis of Cancer" to Bio-Nucleonics, Inc. of Miami, Florida. The patent rights in these inventions have been assigned to the United States of America, except for PHS Ref. No. D-001-96/0 in which the patent rights in this invention has been assigned to the United States of America and Dow Chemical, Inc.

The prospective exclusive license field of use may be limited to: The use of CC49 monoclonal antibodies only in conjunction with Bismuth-213 for human radioimmunotherapy (RIT) and

the use of CC49 monoclonal antibodies only in conjunction with Bismuth-213 as research reagents.

**DATES:** Only written comments and/or applications for a license which are received by NIH on or before July 28, 1997 will be considered.

**ADDRESSES:** Requests for copies of the patent applications, inquiries, comments and other materials relating to the contemplated licenses should be directed to: Joseph G. Contrera, M.S., J.D., Technology Licensing Specialist, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852-3804; Telephone: (301) 496-7056 ext. 244; Facsimile: (301) 402-0220. A signed Confidentiality Agreement will be required to receive copies of the patent applications.

**SUPPLEMENTARY INFORMATION:** The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless within sixty (60) days from the date of this published notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The invention relates to a monoclonal anti-tumor antibody, designated CC49 which is a second generation monoclonal antibody of the B72.3 antibody. CC49 recognizes the tumor associated glycoprotein, TAG-72. The TAG-72 antigen is expressed on at least 75% of colorectal cancers; 85% of ovarian, endometrial, gastric, and pancreatic cancers; 60% of prostate cancers; and approximately 50% of breast and lung cancers. Of particular importance is the fact that B72.3, the first generation monoclonal antibody specific for TAG-72, was the first monoclonal antibody to be approved by the Food and Drug Administration (FDA) for *in-vivo* use.

For working with B72.3, a second generation antibody, designated CC49 was developed which is highly specific for the same TAG-72 antigen. The CC49 monoclonal antibody specific for TAG-72 glycoprotein is currently in preclinical studies, and shows superior results over B72.3. The CC49 monoclonal antibody and the gene which encodes for it, is the subject technology of this exclusive license application.

Applications for a license in the field of use filed in response of this notice will be treated as objections to the grant of the contemplated licenses. Comments

and objections submitted to this notice will not be made available for public inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Dated: May 19, 1997.
