The Office of Management and Budget is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the

functions of the agency, including whether the information will have practical utility;

- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

Title: Mid-Summer Report.

OMB Number: 1205-XXXX.

Frequency: One-time Report.

Affected Public: State and Local Job Training Partnership Act Agencies.

Number of Respondents: 56.

Estimated Time Per Respondent: Two hours.

Total Burden Hours: 112.

Total Burden Cost (capital/startup): N/A.

Total Burden Cost (operating/maintaining): \$750.

Description: The information collected would consist of information on both funding and enrollment levels. The information collected by the State would be rolled up into a summary report for each State. The information would be an update of the planned funding and enrollment data, except the planned figures would be reflected with preliminary actual data. There are only eleven data elements requested from each State. The report would be prepared as of July 15, 1997. The report would be forwarded to the Department of Labor.

This data is needed in order to provide information on the summer youth employment program in response to concerns likely to be raised by the U.S. Congress, the media and the Administration. It has been the Department's experience that there is a consistent and continuing need for this limited information. Traditionally, Congress wants to know the numbers of youth being served as they make final adjustments to the budgets which are under development. The media wants to provide the public with data to go along with personal interest stories. The Administration wants to know whether the programmatic objectives are being realized. If the data were not collected by the Department in a uniform manner, it is likely that attempts would be made by various parties on an ad hoc basis without any concern for standard points of reference.
