SUPPLEMENTARY INFORMATION:

OMB Approval No.: 3060-0448.

Title: Section 63.07, Special procedures for non-dominant domestic common carriers.

Type of Review: Reinstatement without change, of a previously approved collection for which approval has expired.

Respondents: Business or other for-profit.

Number of Respondents: 5.

Estimate Hour Per Response: 100 hours.

Estimated Annual Reporting and Recordkeeping Cost Burden: N/A.

Frequency of Response: On occasion reporting requirement.

Total Annual Burden: 500 hours.

Needs and Uses: Where a communications facility may have a significant effect on the environment, the Commission's rules implement federally mandated laws by requiring applicants and licensees to submit environmental assessments and undergo environmental review. Section 63.07 subjects domestic, facilities-based common carriers to the same requirements as all other FCC-regulated entities. Specifically, a common carrier is required to ascertain whether its

facility may have a significant environmental effect, and if so, the carrier must submit an environmental assessment and await the completion of environmental review prior to commencing construction. Where the circumstances warrant the filing of an environmental assessment, the information contained therein, is reviewed by Commission staff attorneys, engineers and paraprofessionals. In addition to reviewing the environmental assessment, the Commission staff also solicits the views of other agencies with relevant expertise in order to determine whether the facility will have a significant environmental effect. The Commission staff then informs the carrier of its findings, and affords the carrier the opportunity to "reduce, minimize or eliminate" the environmental problems. In the event the environmental problem remains, the agency is required to prepare Environmental Impact Statements.
