

have different levels of MDQ, which can vary as often as every three months, in order to accommodate their production schedules and to change their MDQs annually based on updated production information. In addition, Shippers will have an opportunity to change their MDQs once per year, upon six months notice to Sea Robin, for any reason.

Sea Robin submits that it has modeled the proposed Rate Schedule FTS-2 after the flexible firm rate schedules approved by the Commission in Shell Gas Pipeline Co., 76 FERC ¶ 61,126 (1996); and Destin Pipeline Company, L.L.C., 79 FERC ¶ 61,395 (1997). Sea Robin believes that implementation of such a Rate Schedule on its system is necessary to remain competitive with the newer pipelines offering this type of firm service for the connection of natural gas supplies.

In conjunction with the new Rate Schedule, Sea Robin proposes to make some clarifications to its existing tariff in order to implement the new service. Specifically, Sea Robin proposes to allocate capacity under both Rate Schedules FTS and FTS-2, if necessary, on a net present value basis. In addition, Sea Robin's capacity release provisions will be applicable to Rate Schedule FTS-2, for those months when shippers are paying the Reservation Charge component of Rate Schedule FTS-2.

Sea Robin has requested to place the new Rate Schedule FTS-2 into effect August 1, 1997. It proposes to post an open season for initial requests for service under the new rate schedule; and, upon review of any valid requests, Sea Robin proposes to implement service under Rate Schedule FTS-2 on October 1, 1997.
