#### Approval of Source Specific Revisions to the Tennessee SIP Regarding Volatile Organic Compounds

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA is taking action on three source specific revisions to the Tennessee State Implementation Plan (SIP) which establish reasonably available control technology requirements (RACT) for the control of volatile organic compound (VOC) emissions from certain operations at Brunswick Marine Corporation, Outboard Marine Corporation, and Essex Group Incorporated. EPA is approving the operating permits for these sources into the SIP with the exception of the portion of one permit which allows the Tennessee Technical Secretary to determine RACT which is being disapproved. These permits were issued consistent with the alternate control plans which established RACT requirements in accordance with the provisions of the Tennessee SIP for developing VOC emission control requirements for major sources for which there is no regulation or guidance for determining RACT. In the final rules section of this **Federal Register**, the EPA is approving the submitted chapter in its entirety as a direct-final rule without prior proposal because the EPA views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this proposed rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this document should do so at this time.

**DATES:** To be considered, comments must be received by August 20, 1997.

#### Approval and Promulgation of Air Quality Implementation Plans; Virginia: Approval of Group III SIP and Coke Oven Rules for Particulate Matter

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA proposes to approve two State Implementation Plan (SIP) revisions submitted by the Commonwealth of Virginia. Approval of Virginia's Group III SIP would establish an ambient air quality standard for particulate matter smaller than 10 micrometers in diameter (PM-10); provide regulatory definitions for "particulate matter," "particulate matter emissions" "PM10," "PM10 emissions,"

and "total suspended particulate matter" (TSP); and modify rules regarding air pollution episodes to include PM-10 as well as TSP action levels. Approval of the coke oven provisions would provide for limits on mass emissions, opacity, and fugitive dust from nonrecovery coke works.

In the final rules section of this **Federal Register**, EPA is approving the State's SIP revisions as a direct final rule without prior proposal because the Agency views this as a noncontroversial SIP revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule.
