

**SUPPLEMENTARY INFORMATION:****Proposed Action**

The proposal is to harvest and manage approximately 880 acres of mature sawtimber stands within the analysis area. The proposal includes the following activities:

- Treatment by harvesting approximately 8.0 MMBF of commercial timber using both even and uneven-aged silvicultural systems. Approximate acres to be treated:

- 380 acres—shelterwood & group selections

- 470 acres—clearcut

- 25 acres—commercial thin

- Construction of approximately 18 miles of specified road and 2 1/2 miles of road reconstruction.

- Post sale work could include, but is not limited to; regeneration and stocking surveys to assure proper reforestation of harvested stands; noxious weed spraying; and thinning of past harvest areas.

**Other Opportunities**

- Remedy road maintenance and erosion problems on road 500.1D by relocating. Obliteration of existing road to eliminate trespass concerns and maintenance problems.

- Reduce sediment production from the Hare Trail (DDT 1199) by relocating or eliminating trail.

- Reduce fuel loading in the head of the Middle Fork Little Snake River.

All proposed activities would take place within the East Big Red analysis area, and are planned for implementation starting in 1999.

**Decision to Be Made**

The Medicine Bow-Routt Forest Supervisor will need to make an informed decision about the selection of one alternative among several. The issues and alternatives developed by the IDT members and public commenters must be analyzed and displayed clearly. From the project record alone, the Forest Supervisor and others who may review the decision, must be able to fully understand the consequences of implementing the selected alternative.

**Preliminary Issues**

- Effects of timber harvest and road construction on watershed condition and thus water quality.

- Effects of timber harvest on wildlife habitat with potential reduction of big game hiding cover along open roads and around meadows from timber harvest, and also the loss of old growth and goshawk habitat.

- Effects on range management.
- Impacts on recreation facilities such as trails and dispersed camp sites.

- Effects on visual quality primarily from forest roads 550 and 505, and those roads and units which are adjacent to trails 1199, 1203, and 1204.

- Effects on roadless character. Several units and roads are proposed within the Dome Peak Roadless Area.

**Scope of the Analysis**

This environmental analysis shall consider the environmental consequences of the proposed action, as well as alternatives reasonably implemented, while meeting the purpose and need of the action.

Dated: July 11, 1997.
