

**SUPPLEMENTARY INFORMATION:****I. Background**

This report is specifically concerned with mechanical power presses. However, because it provides information about point-of-operation injuries, the report is of disproportionately significant value to OSHA. Point-of-operation injuries are the prime safety concern for machine tools in general, not just mechanical power presses. This report provides OSHA with an ongoing and current view of the causes of point-of-operation injuries, with an extremely low burden on the public.

In addition, OSHA is conducting a national emphasis program aimed at reducing the number and severity of power press injuries. It will continue to need the information provided in the reports to monitor the types of injuries reported and the sorts of equipment and conditions associated with these injuries. Existing reports were useful in identifying affected industries and equipment, but as industry patterns evolve and new technologies arise (or old ones decline), it will be useful to have up-to-date information. Regardless of whether this information is currently needed for the revision of regulations, it is useful in the context of enforcement planning, compliance officer training, and possibly, of use in relation to the development of hazard alerts about particularly hazardous equipment or operations.

The Occupational Safety and Health Administration (OSHA) currently has approval from the Office of Management and Budget (OMB) for certain information collection requirements contained in 29 CFR 1910.217(g). That approval will expire on March 31, 1997, unless OSHA applies for an extension of the OMB approval. This notice initiates the process for OSHA to request an extension of the current OMB approval. This notice also solicits public comment on OSHA's existing paperwork burden estimates from these interested parties and to seek public response to several questions related to the development of OSHA's estimation. Interested parties are requested to review OSHA's existing estimates, which are based upon information available during rulemaking, and to comment on their accuracy or appropriateness in today's workplace situation.

**II. Current Actions**

This notice requests an extension of the current OMB approval of the paperwork requirements in 29 CFR 1910.217(g), Reports of injuries to

employees operating mechanical power presses.

*Type of Review:* Extension of currently approved collection.

*Agency:* U.S. Department of Labor, Occupational Safety and Health Administration

*Title:* Reports of Injuries to Employees Operating Mechanical Power Presses (29 CFR 1910.217(g)).

*OMB Number:* 1218-0070.

*Agency Number:* Docket No. ICR-97-1.

*Frequency:* As needed, upon injuries to employees operating mechanical power presses.

*Affected Public:* Business or other for-profit institutions.

*Number of respondents:* 191.

*Estimated Time Per Respondent:* 0.3 hours.

*Total Estimated Cost:* \$1,948.

*Total Burden Hours:* 57.3.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request. They will also become a matter of public record.

Dated: January 21, 1997.
