## NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

### Records Schedules; Availability and Request for Comments

**AGENCY:** National Archives and Records Administration, Office of Records Services.

**ACTION:** Notice of availability of proposed records schedules; request for comments.

**SUMMARY:** The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that propose the destruction of records not previously authorized for disposal, or reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 U.S.C. 3303a(a).

**DATES:** Requests for copies must be received in writing on or before September 29, 1997. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

**ADDRESSES:** Address requests for single copies of schedules identified in this notice to the Civilian Appraisal Staff (NWRC), National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in the parentheses immediately after the name of the requesting agency.

**FOR FURTHER INFORMATION CONTACT:** Michael L. Miller, Director, Records Management Programs, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740-6001, telephone (301)713-7110.

**SUPPLEMENTARY INFORMATION:** Each year U.S. Government agencies create

billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

## NUCLEAR REGULATORY COMMISSION

[IA 97-065]

### Order Prohibiting Involvement in NRC-Licensed Activities (Effective Immediately) Pending Further Order; Aharon Ben-Haim, Ph.D., Upper Montclair, New Jersey

#### I

Aharon Ben-Haim, Ph.D. (Dr. Ben-Haim), Medical Physicist, Upper Montclair, New Jersey, is a consultant for Newark Medical Associates, P.A. (licensee), the holder of Byproduct Nuclear Material License No. 29-30282-01 (license) issued by the Nuclear Regulatory Commission (NRC or Commission) pursuant to 10 CFR part 30. The license authorizes possession and use of any radiopharmaceutical identified in 10 CFR 35.200 for any imaging and localization procedure approved in 10 CFR 35.200. The license was originally issued on September 25, 1996, and is due to expire on September 30, 2001.

#### II

On January 29, 1997, the NRC conducted an inspection at the licensee's facility in Newark, New Jersey. During the inspection, several apparent violations of NRC requirements were identified. One of the violations involved the continued use of radioactive material by the licensee despite the fact that the only authorized user listed on the license (who was also listed as the Radiation Safety Officer (RSO)), had not ever performed any authorized user or RSO duties and had not ever been affiliated with the company. Specifically, Gerard W. Moskowitz, M.D. (Dr. Moskowitz), was listed on the application as the RSO and authorized user without his knowledge. Dr. Moskowitz did not become aware that he was listed on the application and the license until notified by the NRC on February 6, 1997, more than four months after the license was originally issued.

Subsequent to the inspection, the NRC verified, based on an investigation by the NRC Office of Investigations (OI), that the licensee's letter, dated February 22, 1996, signed by Dr. Elamir, licensee President, transmitting the license application (NRC Form 313) dated February 2, 1996, was inaccurate in that it listed Dr. Moskowitz as the authorized

user and Radiation Safety Officer without Dr. Moskowitz's consent or knowledge, and without Dr. Moskowitz ever having been affiliated or associated with the licensee. Further, Dr. Moskowitz did not ever perform the role of RSO at the licensee's facility. The NRC also learned that Dr. Ben-Haim, in his capacity as a consultant, had completed the license application for Dr. Elamir. As such, the licensee's application for a license to possess and use byproduct material was provided with information that was not complete and accurate in all material respects. These inaccurate statements in the licensee's application, signed by Dr. Elamir, and prepared by Dr. Ben-Haim, formed, in part, the basis for the issuance of the license to Newark Medical Associates on September 25, 1996. Further, the licensee continued to conduct NRC-licensed activities even though Dr. Ben-Haim, as the licensee consultant, knew that the licensee did not have an RSO.

#### III

Although the NRC staff's review of the results of the OI investigation is ongoing, the evidence that NRC has obtained indicates that Dr. Ben-Haim's actions in causing violations of NRC requirements were deliberate. The NRC
