

(WWP) tendered for filing with the Federal Energy Regulatory Commission executed Service Agreements for Non-Firm Point-To-Point Transmission Service under WWP's Open Access Transmission Tariff—FERC Electric Tariff, Volume No. 8. WWP requests the Service Agreements be given effective dates of July 1, 1997 and July 16, 1997.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before August 26, 1997. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Linwood A. Watson, Jr.,

Acting Secretary.

BILLING CODE 6717-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER97-3526-000]

Woodruff Energy; Notice of Issuance of Order

August 13, 1997.

Woodruff Energy (Woodruff) submitted for filing a rate schedule under which Woodruff will engage in wholesale electric power and energy transactions as a marketer. Woodruff also requested waiver of various Commission regulations. In particular, Woodruff requested that the Commission grant blanket approval under 18 CFR Part 34 of all future issuances of securities and assumptions of liability by Woodruff.

On August 11, 1997, pursuant to delegated authority, the Director, Division of Applications, Office of Electric Power Regulation, granted requests for blanket approval under Part 34, subject to the following:

Within thirty days of the date of the order, any person desiring to be heard or to protest the blanket approval of issuances of securities or assumptions of liability by Woodruff should file a motion to intervene or protest with the

Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214).

Absent a request for hearing within this period, Woodruff is authorized to issue securities and assume obligations or liabilities as a guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the corporate purposes of the applicant, and compatible with the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approval of Woodruff's issuances of securities or assumptions of liability.

Notice is hereby given that the deadline for filing motions to intervene or protest, as set forth above, is September 10, 1997. Copies of the full text of the order are available from the Commission's Public Reference Branch, 888 First Street, N.E., Washington, DC 20426.

Linwood A. Watson, Jr.,

Acting Secretary.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-5877-6]

Agency Information Collection Activities Renewal of Final Standards for Hazardous Air Pollutants From Wood Furniture Manufacturing Operations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following proposed and/or continuing Information Collection Requests (ICRs) to the Office of Management and Budget (OMB). Before submitting the ICRs to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collections as described below.

DATES: Comments must be submitted on or before October 20, 1997.

ADDRESSES: Interested parties may obtain a copy of the currently effective

ICR, without charge, by writing to the U.S. Environmental Protection Agency, 401 M Street, SW., Mail Code 2223A, Washington, D.C. 20460, Attention: Robert C. Marshall, Jr.

FOR FURTHER INFORMATION CONTACT:

Robert C. Marshall, Jr., telephone (202) 564-7021, facsimile transmission (202) 564-0039 or e-mail address; marshall.robert@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are wood furniture manufacturing operations.

Title: 40 CFR parts 9 and 63, Final Standards for Hazardous Air Pollutant Emissions From Wood Furniture Manufacturing Operations; 40 CFR part 63, subpart JJ, §§ 63.800 through 63.819.

OMB Control Number: 2060-0324.

Expiration Date: February 10, 1998.

Abstract: Information is supplied to the Agency under the applicable rule by owners and operators of new and existing wood furniture manufacturing operations that are major sources of hazardous air pollutants (HAPs). An estimated 750 of the 11,000 existing wood furniture manufacturers are major HAP emitters.

The respondents are required by 40 CFR part 63, subparts A (General Provisions) and JJ (source-specific provisions) to submit periodic reports and perform various recordkeeping activities to enable the Administrator to:

- (i) Identify new, modified, reconstructed and existing sources subject to the standard, and
- (ii) Ensure that the standards, which are based on maximum achievable control technology, are being met.

The reporting requirements of the standard include: (1) Submission of an application requesting approval for construction/reconstruction; (2) notification of start-up, construction and reconstruction; (3) notification of physical/operational changes; (4) site-specific performance and CMS performance evaluation test plans; (5) notification and reporting of performance and CMS tests/results; (6) a semi-annual compliance report; (7) work practice standards implementation plan reports; (8) notification to the Agency of rule applicability; and (9) notification and reporting of compliance status.

The recordkeeping requirements of the rule include: (1) Five-year maintenance and retention of records; (2) records of startups, shutdowns, and malfunctions; (3) records required as part of the work practice implementation plan; (4) continuous monitoring system (CMS) data records; (5) records of the types and quantities of

finishing, cleaning materials and adhesives used; (6) monthly weighted average emission calculations; (7) documentation of area source status, if claimed; and (8) records of performance and CMS tests.

Most recordkeeping and reporting provisions of the rule consist of emissions-related data and other information not considered confidential. However, the confidentiality of certain information obtained by the Agency is safeguarded according to Agency policies set forth in title 40, chapter I, part 2, subpart B—Confidentiality of Business Information (see 40 CFR part 2; 41 FR 36902, September 1, 1976; amended by 43 FR 3999, September 8, 1978; 43 FR 42251, September 20, 1987; 44 FR 17674, March 23, 1979).

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the Agency's regulations are listed in 40 CFR part 9.

The Agency would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The previous ICR, approved for use through February 10, 1998, indicates an average annual person-hours burden, during the first three years of rule implementation, of 140,603 person-hours. However, it should be recognized that the burden costs the first year of operation under the rule are somewhat different than the burden costs to maintain compliance with the rule year-after-year. As explained below, the first year burden costs include certain initial, one-time-only, reporting costs plus the same recordkeeping burden costs as the second and third year. The second and third year reporting burden costs include recurring costs associated with

subsequent years of operation (in addition to the same recordkeeping costs incurred the first year of operation). By adding the annual person-hour figures for the first three years of operation and dividing by three, an average annual person-hour figure of 140,603 is computed.

The initial reporting costs unique to the first year of operation include: (1) 8,835 technical person-hours, 442 management person-hours, and 884 clerical person-hours to report on the various initial performance and CMS tests required to determine the capture/control equipment efficiencies; (2) 45,000 technical person-hours, 2,250 management person-hours, and 4,500 clerical person-hours to develop a work practice implementation manual; (3) 1,532 technical person-hours, 77 management person-hours, and 153 clerical person-hours to notify the Agency of rule applicability to their manufacturing and to report on the initial performance/CMS test results; and (4) 640 technical person-hours, 36 management person-hours, and 64 clerical person-hours to develop startup, shutdown, malfunctions, and CMS quality control plans. The first year reporting costs also include: (1) 750 technical person-hours, 38 management person-hours, and 75 clerical person-hours to read instructions, and (2) 1,654 technical person-hours, 84 management person-hours, and 166 clerical person-hours to notify the Agency of any construction, reconstruction, physical, operational change, or actual startup, and to provide excess emissions reports as required.

Reporting burdens after the first year of operation include: (1) 152 technical person-hours, 8 management person-hours, 15 clerical person-hours for subsequent construction/reconstruction application and approval; (2) 750 technical person-hours, 38 management person-hours, and 75 clerical person-hours to read instructions; (3) 7,526 technical person-hours, 378 management person-hours, and 753 clerical person-hours to notify the Agency of any construction, reconstruction, physical, operational change, or actual startup, and to provide compliance status and excess emissions reports as required; and (4) 58,500 technical person-hours, 2,925 management person-hours, and 5,850 clerical person-hours to maintain lists of the types and quantities of volatile HAP materials used.

Recordkeeping burdens during the first year of operation and each year thereafter are the same and include the following: (1) An estimated 30,000 technical person-hours; 1,500

management person-hours and 3,000 clerical person-hours to develop recordkeeping systems; (2) a total of 4,272 technical person-hours; 213 management person-hours and 427 clerical person-hours to record startup, shutdown, malfunction information, document completion of operator training courses, compile records of CMS parameters and the types/quantities of volatile HAP materials used; (3) a total of 24,000 technical person-hours; 1,200 management person-hours and 2,400 clerical person-hours to train in-plant personnel to various surfacing coating and control equipment in compliance with the rule.

To compute the annual cost burden in dollars expended, the technical person-hours were multiplied by an hourly rate of \$33, the management person-hours were multiplied by an hourly rate of \$49 per hour, and the clerical person-hours multiplied by \$15 per hour. Using these hourly rates an average annual dollar cost figure is \$4,517,642.

As described above, the burden estimates include the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: August 12, 1997.

Bruce Weddle,

Acting Director, Office of Compliance.
