

from new plumbing fittings and fixtures in September 1994. EPA participated in the development of the NSF Standard because the Agency felt that, rather than promulgating a regulation, limiting the amount of lead leaching from brass and other alloys into drinking water would be best achieved through a voluntary standard, which is fully protective on a health basis and technologically achievable by industry in a reasonable period of time. In the Agency's view, NSF Standard 61, section 9 satisfies the requirement of section 1417(e), that a voluntary standard be established. Thus, the obligation to issue regulations is not triggered. See S. Rep. 104-169 "104th Cong.), at 95." Copies of NSF Standard 61, and the listings of products meeting this standard may be obtained from NSF International, 3475 Plymouth Road, PO Box 130140, Ann Arbor, MI 48113-0140. The telephone number is 313-769-8010.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 04, 1997 (62 FR 16154).

Draft EISs

ERP No. D-AFS-L61214-OR
Kalmiopsis Wilderness, Approval for Motorized Vehicular Access to the Private Property within the Chetco River, Illinois Valley Ranger District, Siskiyou National Forest, Curry County, OR.

Summary: Based upon our abbreviated review, EPA does not foresee having any environmental concerns to the proposed project.

ERP No. D-AFS-L65286-OR Rating EC2, Summit Fire Recovery Forest Restoration Project, Implementation, Malheur National Forest, Long Creek Ranger District, Grant County, OR.

Summary: EPA expressed environmental concerns about potential adverse impacts do not exacerbate existing conditions nor cause additional environmental impacts.

ERP No. D-AFS-L65290-ID Rating EC2, North Lochsa Face Landscape and Watershed Assessment Project, Implementation, Clearwater National Forest, Lochsa Ranger District, Idaho County, ID.

Summary: EPA expressed environmental concerns about potential adverse impacts to air quality concerns from burning, potential water quality impacts to riparian areas and the Wild and Scenic River Corridor.

ERP No. D-BLM-L65273-ID Rating EC2, Owyhee Resource Management Plan, Implementation, Lower Snake River District, Owyhee County, ID.

Summary: EPA expressed environmental concerns about potential adverse impacts on water and air quality.

and additional information regarding NASA's noise analysis.

Final EISs

ERP No. F-AFS-K65183-CA Whale Rock Analysis Area Multi-Resource Improvement and Management Plan, Implementation, Eldorado National Forest, Pacific Southwest Region, Eldorado County, CA.

Summary: EPA expressed environmental continuing concern with the project's ratio of new road construction to road closure/obliterations, and requested that the Forest Service conduct an analysis of additional road closure/obliteration opportunities prior to initiation of project activities.

Summary: EPA remains in fundamental disagreement with NRC's choice of appropriate levels for clean-up of decommissioned NRC licensed facilities. EPA believes that clean-ups of radioactivity should ensure both that no member of the public receive greater than 15 millirem per year and that groundwater that is a current or potential future source of drinking water be protected to the Maximum Contaminant Levels (MCLs) found at 40 CFR part 141.

Underground Injection Control Program Hazardous Waste Injection Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; Monsanto Chemical Company, (Monsanto)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final decision on petition reissuance.

SUMMARY: Notice is hereby given that reissuance of an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to Monsanto, for the Class I injection wells located at Chocolate Bayou, Alvin, Texas. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by Monsanto, of the specific restricted hazardous waste identified in the exemption reissuance, into the Class I hazardous waste injection wells at the Chocolate Bayou, Alvin, Texas facility specifically identified in the modified exemption, for as long as the basis for granting an approval of this exemption remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued June 10, 1997, and closed on July 25, 1997. All comments have been addressed and have been considered in the final decision. This decision constitutes final Agency action and there is no Administrative appeal.

DATES: This action is effective as of August 15, 1997.
