SUPPLEMENTARY INFORMATION:

Background

In 1979, the Department of Health and Human Services began an initiative to use health promotion and disease prevention objectives to improve the health of people living in the United States. The first set of national health targets was published that year in *Healthy People: The Surgeon General's Report on Health Promotion and Disease Prevention*, which included five goals to be achieved by 1990 to reduce mortality among four different age groups and increase independence among older adults. The goals were supported by objectives that were released in 1980, also with 1990 targets.

Healthy People 2000, the second and current national prevention initiative, reflects the progress and experience of ten years, as well as an expanded science base and surveillance system. With the collaboration of an extensive network of voluntary and professional organizations, businesses, and

individuals, the framework of *Healthy People 2000* was designed with three broad goals—increasing the span of healthy life, reducing health disparities, and achieving access to clinical preventive services. To help meet these goals, 319 objectives and 319 special population targets, organized into 22 priority areas, aim to achieve improvements in health status, risk reduction, and service delivery.

Structure of Healthy People 2010

The healthy People 2010 process will build on *Healthy People 2000*. To ensure that the year 2010 goals and objectives address the needs of their many stakeholders, your input is requested. ODPHP is soliciting public assessment and comments on a preliminary framework (see Appendix to this Notice), which was developed with the assistance of focus groups composed of representatives from Healthy People 2000 Consortium member organizations. This draft framework includes a vision statement "Healthy People in Healthy Communities." Two overarching goals for the Nation are proposed: (1) Increase years of healthy life, and (2) eliminate health disparities. This first goal continues the year 2000 goal with an emphasis on increasing quality life years, not just life expectancy. The second goal strengthens the Healthy People 2000 goal of reducing health disparities by calling for the elimination of those disparities. Four proposed enabling goals accompany the overarching ones. Their purpose is to provide strategies to achieve the overarching goals by: (Promoting healthy behaviors; (2) protecting health; (3) assuring access to quality health care; and (4) strengthening community prevention activities.

The proposed focus areas are analogous to, and for the most part use the same names as, Healthy People 2000 priority areas. The term "focus area" was chosen to avoid any implication of prioritization. New focus areas have been suggested in response to changes in health care and public health during the last 10 years and those anticipated over the next decade. These include mental and physical impairment and disability, and public health infrastructure. Since one of the overarching goals is to eliminate health disparities, specific special population focus areas—low income, race/ethnicity, gender, age, and people with disabilities—are under consideration to address this goal. In each of these focus areas, special population objectives would target the most significant
