

of Psychiatry at the University of California at San Diego School of Medicine, will weigh the scientific evidence and write a draft statement that will be presented to the audience on the third day. The consensus statement will address the following key questions:

\* What is the scientific evidence to support a conceptualization of opiate addiction as a medical disorder including natural history, genetics and risk factors, pathophysiology, and how is diagnosis established?

\* What are the consequences of untreated opiate addiction to individuals, families and society?

\* What is the efficacy of current treatment modalities in the management of opiate addiction including detoxification alone, non-pharmacological/psychosocial treatment, treatment with opiate antagonists, and treatment with opiate agonists (short-term and long-term)?

\* What is the (scientific evidence for the) most effective use of opiate agonists in the treatment of opiate addiction?

\* What are the important barriers to effective use of opiate agonists in the treatment of opiate addiction in the U.S., including perceptions and the adverse consequences of opiate agonist use, legal, regulatory, financial and programmatic barriers?

\* What are the future research areas and recommendations for improving opiate agonist treatment and improving access?

The primary sponsors of this meeting are the National Institute on Drug Abuse and the NIH Office of Medical Applications Research. The conference is co-sponsored by the NIH Office of Research on Women's Health.
