SUPPLEMENTARY INFORMATION:

Title: 30 CFR Part 254, Response Plans for Facilities Located Seaward of the Coast Line.

Abstract: The Federal Water Pollution Control Act (FWPCA), as amended by

the Oil Pollution Act of 1990 (OPA), requires that a spill-response plan be submitted for offshore facilities prior to February 18, 1993. The OPA specifies that after that date, an offshore facility may not handle, store, or transport oil unless a plan has been submitted. To implement the provisions of these statutes, MMS published a final rule in the **Federal Register** on March 25, 1997 (62 FR 13991). These regulations require respondents to provide information and maintain records on their spill-response capability and efforts to prevent oil spills or prevent substantial threats of such discharges. The MMS uses the information to determine the overall effectiveness of owners/operators in preventing oil spills and their capability to respond in the event of an oil spill. Responses to this collection of information are mandatory. No confidential or sensitive information is collected.

Number and Description of Respondents: Approximately 193 owners and operators of facilities located in both State and Federal waters seaward of the coast line.

Frequency: The reporting and recordkeeping requirements and number of responses vary for each section and are mostly on occasion, but most will respond at least once per year (see chart below).

Estimated Annual Burden on Respondents: Reporting and recordkeeping "hour" burden of 47,439 hours (see charts below). We have identified no reporting and recordkeeping "cost" burdens.
