

Under this program a project is considered to be providing substantial services if a minimum of 51 percent of the persons served by the project reside within the Empowerment Zone or Enterprise Community.

#### *Invitational Priorities*

Under 34 CFR 75.105(c)(1) the Secretary is particularly interested in applications that meet one or more of the following invitational priorities. However, an application that meets one or more of these invitational priorities does not receive competitive or absolute preference over other applications:

#### **Invitational Priority 1—Projects To Enhance Employment Outcomes for Individuals on Public Assistance**

Projects that provide rehabilitation services to individuals with disabilities who are receiving public assistance to enhance employment outcomes that are consistent with the individual's unique strengths, capacities, abilities, interests, priorities, and resources.

#### **Invitational Priority 2—Projects To Increase Client Choice**

Projects that address and emphasize effective ways to increase client choice in the vocational rehabilitation process to enhance employment outcomes that are consistent with the individual's unique strengths, capacities, abilities, interests, priorities, and resources.

**Selection Criteria:** In evaluating an application for a new grant under this competition, the Secretary uses selection criteria chosen from the general selection criteria in § 75.210 of EDGAR. The selection criteria to be used for this competition will be provided in the application package for this competition.

**For Applications Contact:** The Grants and Contracts Service Team (GCST), U.S. Department of Education, 600 Independence Avenue, S.W., Room 3317, Switzer Building, Washington, D.C. 20202-2550. Telephone: (202) 205-8351. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, between 8 a.m. and 8 p.m., Eastern time, Monday through Friday. The preferred method for requesting applications is to FAX your request to (202) 205-8717.

Individuals with disabilities may obtain a copy of the application package in an alternate format by contacting the GCST. However, the Department is not able to reproduce in an alternate format the standard forms included in the application package.

**For Information Contact:** Susan Oswald or Alfreda Reeves, U.S. Department of Education, 600 Independence Avenue, S.W., Room 3314, Switzer Building, Washington, D.C. 20202-2650. Telephone: (202) 260-9870 or (202) 205-9361.

Individuals with disabilities may obtain this document in an alternate format (e.g., Braille, large print, audiotape, or computer diskette) on request to the contact person listed in the preceding paragraph.

**Note:** The official application notice for a discretionary grant competition is the notice published in the **Federal Register**.

#### **Electronic Access to This Document**

Anyone may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or portable document format (pdf) on the World Wide Web at either of the following sites:

<http://ocfo.ed.gov/fedreg/htm>

<http://www.ed.gov/news.html>

To use the pdf you must have the Adobe Acrobat Reader Program with Search, which is available free at either of the previous sites. If you have questions about using the pdf, call the U.S. Government Printing Office toll free at 1-888-293-6498.

Anyone may also view these documents in text copy only on an electronic bulletin board of the Department. Telephone: (202) 219-1511 or, toll free, 1-800-222-4922. The documents are located under Option G—Files/Announcements, Bulletins and Press Releases.

**Note:** The official version of a document is the document published in the **Federal Register**.

*Program Authority:* 29 U.S.C. 777a(a)(1).

Dated: September 12, 1997.

**Judith E. Heumann,**

*Assistant Secretary for Special Education and Rehabilitative Services.*

## **DEPARTMENT OF ENERGY**

### **Floodplain Statement of Findings for Removal Action at the St. Louis Airport Site (SLAPS), St. Louis, Missouri**

**AGENCY:** Department of Energy (DOE), Oak Ridge Operations.

**SUBJECT:** Floodplain Statement of Findings.

**SUMMARY:** This is a Floodplain Statement of Findings prepared in accordance with 10 CFR part 1022. DOE

proposes to remediate soil with elevated levels of uranium-238, radium-226, and thorium-230 from areas in/near the Coldwater Creek 100-year floodplain at SLAPS. DOE prepared a Floodplain and Wetlands Assessment describing the effects, alternatives, and measures designed to avoid or minimize potential harm to or within the affected floodplain. The proposed action would not result in the destruction of any floodplain or wetland and would be consistent with Executive Orders 11988 and 11990, and the President's policy of "no net loss" of wetlands in the United States. There is no practicable alternative to the proposed action, which would conform to applicable state and local floodplain protection standards. DOE would endeavor to allow 15 days of public review after publication of the statement of findings before implementation of the proposed action.

**FOR FURTHER INFORMATION ON THIS PROPOSED ACTION OR TO COMMENT ON THE ACTION, CONTACT:** Mr. Steve McCracken, St. Louis Site Manager, U.S. Department of Energy, 9170 Latty Avenue, Berkeley, MO 63134, Phone: (314) 524-4083, FAX: (314) 524-6044.

**FOR FURTHER INFORMATION ON GENERAL DOE FLOODPLAIN AND WETLANDS ENVIRONMENTAL REVIEW REQUIREMENTS, CONTACT:** Carol M. Borgstrom, Director, Office of NEPA Oversight, EH-42, U.S. Department of Energy, 1000 Independence Avenue, SW, Washington, D.C. 20585, (202) 586-4600 or (800) 472-2756.

**SUPPLEMENTARY INFORMATION:** This is a Floodplain Statement of Findings prepared in accordance with 10 CFR part 1022. A Notice of Floodplain and Wetland Involvement was published in the **Federal Register** on August 27, 1997 (62 FR 45403), and a Floodplain and Wetlands Assessment was incorporated in the engineering evaluation and cost analysis (EE/CA) prepared for SLAPS. Removal actions may include: (1) No action, or (2) removal of radioactively contaminated soil at SLAPS between McDonnell Boulevard and Banshee Road, behind the gabion wall which extends along that portion of Coldwater Creek; the ditch along the south side of McDonnell Boulevard; and, the ditch on the north side of McDonnell Boulevard, or (3) removal of radioactively contaminated soil at SLAPS between McDonnell Boulevard and Banshee Road, behind the gabion wall which extends along that portion of Coldwater Creek and the ditch along the south side of McDonnell Boulevard. The contaminated soil contains elevated levels of uranium-238, radium-226, and

thorium-230. Based on stakeholder participation, Alternative 3 was identified as the preferred alternative. This excavation (Alternative 3) would extend approximately 70 feet to the east and approximately one foot below original grade (approximately 8–10 feet below the existing land surface). The excavated area would be backfilled with clean soil and a berm would be constructed on the eastern edge of the excavation to minimize runoff into the excavated area. Sediments in the ditch between the SLAPS fence and McDonnell Boulevard would be removed from the confluence with the creek to 70 feet east of the confluence in order to provide a clean buffer zone between SLAPS runoff and the creek. Drainage on the northern end of SLAPS (south of McDonnell Boulevard) would be rerouted through an engineered channel to prevent mobilizing sediment in the ditches during storm events prior to discharge into Coldwater Creek. DOE would temporarily store excavated material near the southeast corner of SLAPS prior to transport to an off-site, licensed waste disposal facility. There is no practicable alternative to the proposed action. The proposed action would conform to applicable state and local floodplain protection standards.

The following steps would be taken to minimize potential harm to or within the affected floodplain:

1. The design and performance of excavation activities would incorporate standard best management practices in accordance with U.S. Department of Agriculture Natural Resource Conservation Service (formerly the Soil Conservation Service) methods, or the equivalent, to control erosion and siltation from excavations.

2. Remediation operations would confine the areas of sediment and soil disturbance to the minimum necessary for successful completion of the project.

3. Care would be exercised to provide minimum practicable exposure of sediment and soil to erosion.

4. All erosion and sediment barriers would remain in place until the excavation is successfully stabilized by applicable measures.

5. Disturbed sediment and soil in or adjacent to the floodplain and waterways would be stabilized or otherwise protected to prevent off-site migration, as conditions warrant.

6. Remediation would not obstruct Coldwater Creek and the creek would retain its original capacity for storing floodwaters. The proposed action would

not impede flow or increase flooding along Coldwater Creek.

7. Areas excavated in or adjacent to the floodplain not involved with drainage ditch modification would be restored to current grade and the proposed activities would not subject lives or property to any increased risk of flooding.

8. DOE would not use areas within the floodplain for temporary or permanent storage of excavated sediment or soil.

9. The proposed action would conform to applicable state and local floodplain and protection standards.

10. The proposed action would not result in the destruction of any floodplain or wetland and would be consistent with the President's policy of "no net loss" of wetlands in the United States and Executive Orders 11988 and 11990.

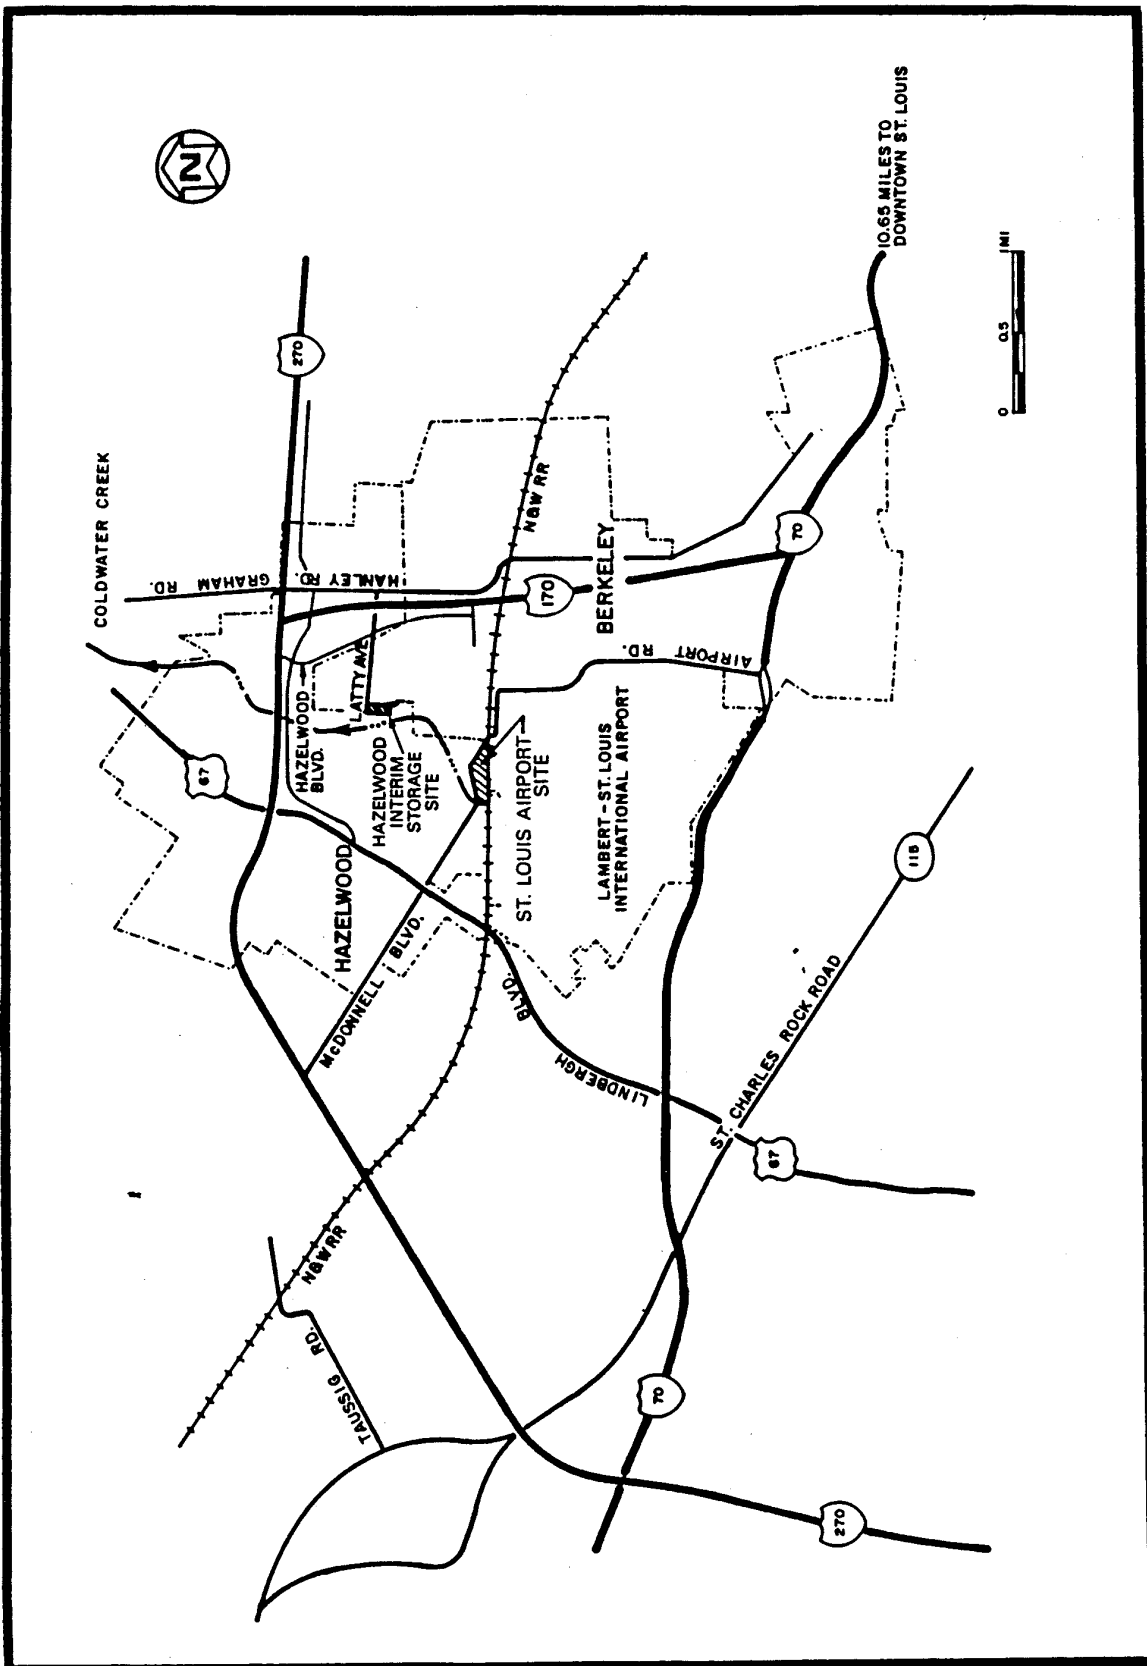

DOE will endeavor to allow 15 days of public review after publication of the statement of findings before implementation of the proposed action.

Issued in Oak Ridge, Tenn. on September 9, 1997.

**James L. Elmore,**

*Alternate NEPA Compliance Officer.*
