Draft Guidance for Industry on Population Pharmacokinetics; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guidance for industry entitled "Population Pharmacokinetics." This draft guidance is intended to provide recommendations regarding the use of population pharmacokinetics in the drug development process. It summarizes scientific and regulatory issues that should be addressed during the conduct of population pharmacokinetic studies/analyses.

DATES: Written comments may be submitted on the draft guidance document by November 17, 1997. General comments on agency guidance documents are welcome at any time.

ADDRESSES: Submit written requests for single copies of the draft guidance for

industry entitled "Population Pharmacokinetics" to the Drug Information Branch (HFD-210), Center for Drug Evaluation and Research, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857. Send two self-addressed adhesive labels to assist that office in processing your request. Submit written comments on the draft guidance to the Dockets Management Branch (HFA-305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1-23, Rockville, MD 20857. Request and comments should be identified with the docket number found in brackets in the heading of this document. A copy of the draft guidance and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Shiew-Mei Huang, Center for Drug Evaluation and Research (HFD-850), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-594-5671, FAX 301-594-2503.

SUPPLEMENTARY INFORMATION: FDA is

announcing the availability of a draft guidance for industry entitled "Population Pharmacokinetics." Population pharmacokinetics is the study of the sources and correlates of variability in plasma drug concentrations between individuals, representative of those in whom the drug will be used clinically when clinically relevant dosage regimens are administered. Certain pathophysiological features of patients can regularly alter dose-concentration relationships. For example, renal failure usually causes steady state drug concentrations to be greater than those of patients with normal renal function receiving the same dosage of a drug eliminated mostly by the kidney. Population pharmacokinetics seeks to discover which measurable pathophysiologic factors cause changes in the dose-concentration relationship and to what degree so that appropriate dosage can be recommended.

This draft guidance presents a comprehensive overview of population methods, including when to perform a population study/analysis; how to design and execute population pharmacokinetic studies; how to handle and analyze population pharmacokinetic data; how to perform internal and external validation of population pharmacokinetic models; and how to provide the appropriate documentation for population pharmacokinetic reports intended for submission to the FDA.

This draft guidance represents the agency's current thinking on population pharmacokinetics. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirement of the applicable statute, regulations, or both.

Interested persons may submit written comments on the draft guidance to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. The draft guidance and received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

An electronic version of this draft guidance is available on the Internet at <http://www.fda.gov/cder/guidance/index.htm>.

Dated: September 12, 1997.
