**ACTION:** Notice.

**SUMMARY:** The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. - evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- enhance the quality, utility, and clarity of the information to be collected; and
- minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

MSHA qualifies mine electricians and certifies persons to take noise level measurements in coal mines. MSHA Form 5000–1 is used to report to MSHA those miners who have satisfactorily completed (1) a coal mine electrical training program; or (2) a noise training course. Based on the information submitted on Form 5000–1, MSHA issues certification cards that identify these individuals as qualified to perform certain tasks at the mine.

Title 30 CFR 75.153(a)(2) and 77.103(a)(2) require that a program be provided for the qualification of certain experienced personnel as mine electricians. Title 30 CFR 70.504 and 71.801 require that mine operators measure the noise levels to which each miner is exposed and that these measurements be taken by a person who has been certified by the Assistant Secretary of Labor for Mine Safety and Health as qualified. A qualified person is one who has been certified by MSHA as an instructor in noise measurement training programs; or has completed a noise training course conducted by and approved by MSHA.

**II. Current Actions**

MSHA uses the information from MSHA Form 5000–1 to issue certification cards to those persons who are qualified. MSHA inspectors may ask to see the cards to determine compliance with regulations during routine inspections. Mine operators use the cards to determine a person's
